Call to Order
Chairman Sellers called the State Transportation Board Meeting to order at 9:00 a.m.

Pledge
The Pledge of Allegiance was led by Board Member Thompson

Roll Call by Board Secretary
A quorum of the State Transportation Board was present. In attendance: Chairman Sellers, Vice Chairman Hammond, Board Member Stratton, Board Member Thompson, Board Member Elters and Board Member Knight. There were approximately 55 members of the public in the audience.

Title VI of the Civil Rights Act
ADOT Executive Officer, Floyd Roehrich, Jr. reminded all attendees to please fill out the optional survey cards to assist our Civil Rights Department.

Call to the Audience for the Board Meeting
An opportunity was provided to members of the public to address the State Transportation Board. Members of the public were requested not to exceed a three minute time period for their comments.

1. Stephanie Irwin, Mayor-Pinetop-Lakeside
2. Janell Sterner, Vice Mayor, Payson
3. Chris Higgins, Council Member, Payson
4. Jim Ferris, Payson Town Council
5. Ana Olivares, Pima Transportation Director
6. Steve Sanders, Public Works Director, Gila County
7. Eric Duthie, Tusayan Town Manager
8. Darryl Ahasteen, Commissioner, Nahata Dziil Commission Governance
9. Darrell Tso, Nahata Dziil Commission President
10. Margaret Bedunie, Nahata Dziil Commissioner
11. Taft Blackhorse, Jr., Navajo DOT, Department Manager
12. Kee Allen Begay, Jr., Navajo Council
13. Jemel Horseson, NDCG Commissioner
14. Raymond Smith, Navajo Nation Council
15. Wayne Lynch, NDCG Commissioner
16. Patti King, Pinal Alliance for Economic Growth, Executive Manager (did not speak)
REPORTER'S TRANSCRIPT OF PROCEEDINGS

Town of Pinetop-Lakeside
Council Chambers
325 West White Mountain Road
Lakeside, Arizona  85929

June 21, 2019
9:00 a.m.

PREPARED FOR:
ADOT - STATE TRANSPORTATION BOARD
CALL TO THE AUDIENCE

SPEAKER:  PAGE:
Mayor Stephanie Irwin ........................................ 5
Vice Mayor Janell Sterner .................................... 6
Chris Higgins .................................................. 8
Jim Ferris ..................................................... 10
Ana Olivares .................................................. 11
Steve Sanders .................................................. 13

AGENDA ITEMS

Item 1 - Director's Report, John Halikowski, ADOT Director.................................29

Item 2 - District Engineer's Report, Matt Moul, District Engineer, Northeast District........33

Item 3 - Consent Agenda..........................................................36

Item 4 - Financial Report, Kristine Ward, Chief Financial Officer.............................37

Item 5 - Final Approval of the FY 2020-2024 Five-Year Transportation Facilities Construction Program, Greg Byres, Division Director, Multimodal Planning Division.........................................................39

Item 6 - Multimodal Planning Division Report, Greg Byres, Division Director, Multimodal Planning Division.....113

Item 7 - Priority Planning Advisory Committee (PPAC), Greg Byres, Division Director, Multimodal Planning Division.................................................................113

Item 8 - State Engineer's Report, Dallas Hammit, Deputy Director of Transportation/State Engineer..........116

Item 9 - Construction Projects, Dallas Hammit, Deputy Director of Transportation/State Engineer..........117

Item 10 - Suggestions.................................................................122
CHAIRMAN SELLERS: Now moving on to call to the audience. This is an opportunity for members of the public to discuss items of interest to the Board. Please fill out a Request For Public Input Form and giving give it to the Board secretary if you wish to address the Board.

In the interest of time, a three minute time limit will be imposed, and this is probably the most challenging part of being chair is trying to ensure that you do as good a job as possible at pronouncing the names on the cards.

So first up, we have Mayor Stephanie Irwin.

MR. ROEHRICH: Mr. Chair, if I could, also, as the Mayor's coming up, we do a timer here that does give the three minute time limit with a little beep at the end. Please (inaudible).

CHAIRMAN SELLERS: Thank you.

MAYOR IRWIN: Good morning. Thank you, Mr. Chairman, members of the Board and your staff.

On behalf of the town of Pinetop-Lakeside, I would just like to once again welcome you to our community and to our facility. As some of you have alluded, this is a new building, and we are very proud of it. We would invite you to make use of it at any future meetings that we would like to have. And as Mr. Thompson alluded to, we did have a historic meeting a couple weeks ago, and I look forward to those
relationships continuing with the tribe and with our neighboring communities. We all need to work together for the betterment of our region.

Thank you again. I hope you enjoy your stay, and if there's anything we can do, if our staff can do anything to help you, please let us know. Okay? You.

CHAIRMAN SELLERS: Thank you.

MAYOR IRWIN: Thank you.

CHAIRMAN SELLERS: Next I have Janell Sterner.

VICE MAYOR STERNER: (Inaudible.)

CHAIRMAN SELLERS: Pardon?

VICE MAYOR STERNER: Good morning, Chair, Chair and board members. I'm very excited to be here. My name is Janell Sterner. I'm the vice mayor for Payson, Arizona. It's weird being on this side, so bear with me.

I am going to just talk for the three minutes or less regarding the five-year contract regarding Lion Springs. In Payson, we created Resolution No. 3150 regarding that we would love to see that the Arizona Department of Transportation would continue to put the Lion Springs section into the five-year construction plan.

A couple of the items that we talked about would be improve safety of motorists. This last remaining section is a source of significant of accidents, both in numbers and severity because of the speeds involved and the narrowness of
the roadway make many collision in the area result in serious injuries and times and death.

And again, we came up that way, and as one of the other board members and I were talking, we could see the difference that that would make to so many people that come up here. And having that section still in that five-year plan, we are definitely asking that you guys would support that.

Also, improved visitor access to you guys up here, too. This wonderful Pinetop-Lakeside. It's been decades since I've been here, so I apologize. But it's very beautiful.

Also, improved environmental benefits. Again, during the summertime, if you guys have been in that area, you know it's a standstill. Miles and miles of standstill, the exhaust, everything, and then that does impact the pristine mountain air that we have.

Improved quality of life. Traffic backlogs create that bottleneck, that main area through the Payson Star Valley, and it is sometimes a nightmare.

Also, for our emergency services, you know, again, there's no areas for people if their cars are having issues to pull over or for -- you're talking your commercial vehicles or even also your -- just motorists that need to pull over. There's no area for that time, and then if emergencies need to get in there, first responders, it's making it hard. So I just ask that you really consider it and add that back into
that five-year construction plan.

    Thank you so much, and appreciate your time.

Thank you.

CHAIRMAN SELLERS: Thank you.

Next we have Chris Higgins, and on deck we'll have Jim Ferris.

MR. HIGGINS: Thank you, Mr. Chairman, and board members. My name is Chris Higgins, and I'm a Payson Town Council member, and I'm here speaking on the same issue as our vice mayor, Janell Sterner.

    Put that up a little bit.

    But I have come before you today just to ask that you consider putting the Lion Springs project back into the five-year plan. Our town, as our vice mayor stated, submitted Resolution 3150. That did go over just all of the positive impacts the project would have on the area, motorist safety, access to the Rim Country and to the White Mountains; environmental impact, quality of life, wildlife, suppression of wildfires and emergency services.

    Also, in Resolution 3150, I really noticed how it stated that over 300 million has been put into improvements of State Route 87 between Phoenix and Payson, and an additional 300 million from just outside Star Valley, just past the Lion Springs section up onto the rim. And really, this is the only, like, bottleneck left in that section of highway from Phoenix up
here to the White Mountains.

It reminded me a lot today driving up -- I don't know how many of you traveled Highway 87 when it went through Sunflower, but I used to do that when we first moved up to the Rim Country. I was still working in the valley, and I would travel that every day during the week, and especially on holiday weekends, how there was a real bottleneck there in Sunflower, and that Lion Springs section is very similar where it just can create a real bottleneck. And in fact, just yesterday there was some work being done, I believe sealing, just before that Lion Springs section. And in a matter of hours, traffic had backed up all the way into Payson from that section of road, and that was on a Thursday.

So the weekend traffic that we have, it just keeps increasing, which is great. It's wonderful. But this section of highway, I think, will really be a problem going forward, and if isn't kept in the five-year plan, then it's even pushed out further.

So again, I ask that you at least consider keeping this in this five-year plan. Thank you for all that you're doing, and also, understanding budgets and there's more projects than money, so completely understand that. But thank you for considering this, and thank you for letting us speak today.

CHAIRMAN SELLERS: Thank you.
Okay. Jim Ferris. On deck we have Ana Olivares.

MR. FERRIS: Yes. My name is Jim Ferris. I'm a Payson Town Council member, also. We're here in force today. But I do think the Lion Springs project, making that four lanes would address, you know, these adverse conditions, and one is just the high incidence of accidents on that stretch of road.

The second, it would be just to relieve the traffic congestion, especially during weekends and holidays, which Councilman Higgins had mentioned is a problem.

Another reason I think it's -- would open up and make a better evacuation route for wildfires. I'm sure you're all aware what's happening around Roosevelt right now. And the other thing besides being a fire break, that four-lane would also create a much better buffer for fires moving through there. They got a better chance of suppressing it.

The other thing that, if you go by -- there's no shoulder there. It's a two-lane. If you have any car problems, flat tire or anything, you're obstructing it. If you're going to try to pull off, your car's going to hang out on the highway and you're going to, you know, risk getting hit there.

The other thing that -- I believe it stifles economic development in our Rim Country up there. People can't come up while they have that irritant of dealing with the traffic. It's going to discourage our tourist, you know, efforts that we have for trying to create tourism in Payson.
The other thing, you know, there's that elk crossing there, and there's a lot of elk there, and I think that's -- you know, you get animals come out where they've got two-way traffic, you know, right next to each other. That could create a huge problem.

And then just the slow traffic. You get in there, as we did today, get behind one, and it's just -- it's kind of a bottleneck there. And again, without any turn lanes, you know, it's -- I think there's -- it's a dangerous situation for ingress and egress for anybody that lives along there, has any business along that stretch.

So I appreciate your listening to us, giving us an opportunity to express, you know, our concerns. Thank you.

CHAIRMAN SELLERS: Thank you.

Ana Olivares. On deck we have Steve Sanders.

MS. OLIVARES: Good morning, Mr. Chair, and members of the Board. My name is Ana Olivares, and I'm the transportation director for Pima County. I thank you for the opportunity to speak today.

As I have done at the previous meetings, I am here to speak on the 2024 Tentative Five-Year Plan. And I appreciate the challenge you all face in trying to fund the needs of the State. We were happy to participate in this public process, and have attended every board meeting this calendar year to reiterate how important expanding transportation
infrastructure is to our policy initiative to grow our local and regional economy.

At every meeting we have requested your support in accelerating summer projects that are critical to Pima County's economic growth, and to date there have been no changes to the tentative five-year plan.

At the study session a couple of weeks ago, staff made the suggestion that any accelerations or additions to the tentative plan would require delays or deletions of projects already in the program. Unfortunately, that is not an option for Pima County, as all projects are critically important to the region and what is needed to increase this funding investment to achieve our economic growth goals.

We make our request again to make the following amendments to the tentative plan prior to approval today:

Program the funding for both the design and construction of the interchange at Kino Parkway and the interstate underpass as Forgeus Road. These improvements are necessary to support a major regional sports park currently under construction.

Program additional funding to continue the tier two study of the Sonoran Corridor in fiscal year '21 of this five-year plan. Completion of the tier one EIS is scheduled for spring 2020, and identifying funding for an immediate continuation of the tier two study is critical to continue the
momentum we have built as we develop the tier one.

Program adequate funding for the I-10 Sunset interchange improvements with the I-10 Ina to Ruthrauff widening project. Pima County is continuing the design of the Sunset Innovation Campus in the southwest quadrant of the interchange, and the connection from I-10 to River, including a railroad grade separation, is necessary for this campus to be successful. We are working with the Southcentral District and PAG to make sure that permanent Sunset interchange improvements are completed with this ADOT widening project.

Thank you for your time today.

CHAIRMAN SELLERS: Thank you.

So next up, Steve Sanders, and on deck we have Eric Duthie.

MR. SANDERS: Good morning. Thank you, Board Chairman Sellers, members. I'm just here to speak about Lion Springs, as I have since the Flagstaff meetings, but I have nothing to add that everyone hasn't said ahead of time.

One thing to think about, in Gila County right now, the Woodbury Fire has moved into the county. The sheriff evacuated about 800 residents out of the Roosevelt Lake area yesterday afternoon. Very orderly, good evacuation. No problems. Hate to think what may happen if that would have happened in -- east of Payson in the Lion Springs section. One accident and who knows what may have happened. Just something
to think about. You know, Gila County certainly supports the
Lion Springs project and hopes it gets back to into the
five-year plan some way.

    I want to thank ADOT. They were very proactive
yesterday on the Woodbury Fire. They brought mowers in
yesterday prior to the evacuation, mowed both sides of the
highway down around Roosevelt, doing whatever they could to slow
the fire.

    Appreciate the Pinto Valley Bridge west of
Miami -- between Globe and that's about to begin construction.
A lot of money's been spent on Highway 60. That will just add
to the benefit to getting out of the East Valley, back and
forth, Globe to Phoenix, you know.

    Thanks for your time. Appreciate anything on
Lion Springs.

CHAIRMAN SELLERS: Thank you.

Okay. Next up is Eric Duthie. On deck we have
Darryl Ahasteen.

MR. THOMPSON: Ahasteen.

CHAIRMAN SELLERS: I told you it's a challenge.

MR. DUTHIE: Thank you, Mr. Chair, board members,
Mr. Thompson. It's good to see you again. Thank you.

    We appreciate the work that's been done by
Director Halikowski and his staff. They have come to Tusayan.
As you recall, we've come to see you just about every month.
Tusayan is at the South Rim of the Grand Canyon. That is where traditionally people would call the Grand Canyon. That's where most of the pictures are taken.

We have millions of people travel a two-lane highway for 70 miles to get to the Grand Canyon from Williams. Keep that in mind. Millions of people on a two-lane highway that has not been expanded in decades. We appreciate the fact that there is refurbishing funds set available for Highway 64 in the plan. That's been a long time coming, and we really do sincerely appreciate that and the process that you went through to create priority projects and to recognize the fact that we have a need for traveling safely to and from the Grand Canyon.

I'm also -- been authorized to represent the views and the appreciation of representatives of the national -- Grand Canyon National Park, Department of Interior, U.S. Forest Service, Department of Agriculture, as well as many state agencies, to include the Governor's office, representatives, to include a -- the Arizona Office of Tourism, and the appreciation that they have for having this refurbished project for Highway 64 on the priority list.

We really appreciate how you stick to the priorities that you set. It took us a while to get on that priority. We followed the process to get there. We do appreciate you standing by, making those priorities and sticking to them.
As I understand, and I may be incorrect with this, and if I am, I do apologize, but in reading the amendment for Item 5 regarding Lion Springs, I see that there's a statement here that says it may include -- may require program adjustments to specific projects and the pavement preservation subprogram to be able to move funds. If that is the case and that is discussed, then that becomes reality. I would encourage you greatly not to include Highway 64 as a removal of funds from that project, because we have been working on this as a step-by-step in additional safety issues.

Again, thanks to the Director and his staff for looking at some outside-the-box opportunities. We deal with a lot of international drivers who don't necessarily read English and understand some of the signage we have. So they've been working on ways to help safety there. But we also have a pretty poor road that gets -- and I shouldn't say poor. I don't mean that as an insult towards ADOT. It's just the fact that it's used. When you're talking about millions of people a year on a two-lane highway, it is used.

I can understand the concerns I've just heard expressed about the Lion Springs with the bottlenecks and that. I used to live in this area, and I understand that. We have the two-lane road. We really need to keep that on the program.

Thank you, Mr. Chair.

CHAIRMAN SELLERS: Thank you.
Okay. Next up we have Darryl Ahasteen, and on deck we have Darnell Tso.

MR. AHASTEEN: Darnell Tso?

CHAIRMAN SELLERS: Darrell.

MR. AHASTEEN: Darrell Tso. The other Darryl.

Thank you very much, board members, for letting me present my interest in getting a new port of entry out of Pinta exit. My name is Darryl Ahasteen. I'd introduce myself in Navajo, but that takes about four minutes.

The current port of entry was constructed in Sanders in about 1950 and originally used as an agricultural inspection, and they stopped all motorized vehicles coming into the state of Arizona. The daily count from 1950 to 1919 [sic] has tremendously increased, also.

The use of the thoroughfare for hazardous material has increased from petroleum, and now heavy dangerous material, as uranium, plutonium, and many other type of material are being driven through and inspected in close proximity of a public school and a community is disturbing and alarming.

The nearest highly trained fire department to deal with any type of HAZMAT spill is in Flagstaff, 150 miles to the west, and Albuquerque, almost 200 miles to the east. The local fire department are not highly trained, and they just mainly deal with structural and wild land firefighting. Navajo Nation is not highly trained in that area, also.
The current POE doesn't have a HAZMAT containment staging area. The two public schools that are in close proximity, the Sanders Middle School is about half a mile away from the POE, the Sanders Elementary and the school administration offices, three-quarter of a mile to the west. The middle school is on top of a hill and is only accessible by two-lane highway. It is a cul-de-sac.

Also, drivers going to sleep in this area when they leave their port, let's say Oklahoma City or Los Angeles. This puts them right in the middle. So a lot of them are getting tired. They're getting sleepy. And if you go into New Mexico side, there's a lot of guardrail damage about the vehicle drivers falling asleep, and they're hitting into the guardrail. So this kind of puts them right in the middle. It will be a good area to maybe set up some type of a port of entry or someplace for them to rest, also.

Excuse my cold.

I have other -- other interests and other people that I'm trying to get interested in this. So next month I'll probably bring you something else, but right now, it's a safety issue of the hazardous material that I'm bringing to you. I do have handouts for you. There is a map on the back. And thank you for your time.

CHAIRMAN SELLERS: Thank you.

Next up, Darrell Tso. On deck we have Margaret
Bedunie.

MR. TSO: (Speaking Navajo.) Good morning, Chair and board members. First of all, I'd like to thank the Pinetop and Lakeside community, the leadership for building such a beautiful facility to be able to host such an important meeting here. Then also, each board member, I'd like to thank you for your time and your service and doing a tremendous job in addressing our road needs across our state.

And also, I express the same gratitude to your family members for allowing you to come here and to meet with us. So thank you.

My name is Darrell Tso. I'm a representative of Nahata Dzill. I'm a Commission president. Today you just heard from a Commission member, Darryl Ahasteen, Margaret Bedunie. I also would like to recognize of our council, Navajo Nation council member here, Raymond Smith and Kee Allen Begay.

Today I'd like to continue to propose the port of entry proposal next to the Pinta exit on the I-40 corridor. One of the hardest things about a development like this is to obtain land. It's not often that you're offered 55 acres, and to really consider a place to develop.

I believe that some of the issue Darryl just spoke to, but we also want to propose other amenities. We have a master plan, over 155 acres of a restaurant, motel, a cultural center, a travel center, a truck repair center, and other
amenities that we are considering, but we'd like to invite each
board member to please come visit with us, sit down at the
table, take a look at our proposal, our plan, and then also not
only our plan, but our vision. Catch our vision for northern
Arizona. I think this will greatly benefit northern Arizona.
And also, the tourism that travel through that area. So we'd
like to just say that this is our project. It's just not our
community. It's the northern Arizona community. We'd like to
extend this invitation to you.

And then I know that it's a short time we've been
coming before you, but please consider this also in your five-
year plan. I think that it's been addressed before, but the
only reason it didn't go anywhere is finding the right land and
location, and I think we have a solution to that.

And thank you for your time, and also have a
wonderful day and a great weekend. Thank you. Yeah.

CHAIRMAN SELLERS: Thank you.

Next up we have Margaret Bedunie, and on deck we
have Taft Blackhorse, Junior.

MS. BEDUNIE: Good morning. Good morning, Board,
board members. I'm Margaret Bedunie, and I would like just --
I'd like to advocate for the port of entry in Sanders, and what
I really want is we need a better port of entry, and where the
place is at is kind of dangerous for our people and other
transportation. So I would like for you to consider it and
think about it and give us a good outcome for it -- to -- for
our port of entry in Sanders. And like the two gentlemen have
mentioned and -- we'd like for you to think about it.

That's all I'd like to say. Thank you.

CHAIRMAN SELLERS: Thank you.

Next up we have Taft Blackhorse, Junior, and on
deck we have Kee Allen Begay, Junior.

MR. BLACKHORSE: Good morning. Good morning,
Chair and members of the Transportation Board. My name is Taft
Blackhorse, Junior, and I'm the department manager for the
Navajo Division of Transportation's project management. I
oversee all the archaeology and environmental.

But I'm here to make it known from our division
and the Navajo Nation that we are still advocating in the five-
year plan for US-191 and 160, and the outcry and the notice that
we wanted to present is that it is understood that the community
members would like to be heard, and we want to be heard
improving the road, not just so much for the community members,
but the traveling public.

You're looking at freight lines that are
producing or bringing in products and produce to different areas
to enhance the economy. So widening the road actually benefits
the traveling public from any accident that may occur or
fatalities that have occurred or near misses. So that is very
important to us that the road be widened on 191 and also 160.
160 is in Kayenta, and 191 is between Chinle and Many Farms.

And we're still advocating that. We want to make sure that we still want the Board to understand that we're here, and we're working hard, and we'll have a partnership with ADOT in several years, and also with the county, in Navajo, Apache and Coconino Counties that we have a working relationship, and we have a working relationship with Ermalinda Gene, who's a tribal liaison and a planner. So in that respect, we have a partnership that we always look out for each other. How do we benefit the public and the general public and the traveling public?

So that's why we're here, and I want to reintroduce that, and also, in support to our southern area of Sanders, of moving the port of entry from a different location that is safer to the public.

So I just wanted to say that and say thank you and good morning.

CHAIRMAN SELLERS: Thank you.
Okay. Next is Kee Allen Begay, Junior. On deck we have Jemel Horseson.

MR. BEGAY: Good morning, everyone, Chair, committee members, staff, administrators, the community of Pinetop-Lakeside. My name is Kee Allen Begay, Junior. I am the Tribal Council member representing the central part of the Navajo Nation. Just like you, representing all and discussing
and advocating for the -- for all of the state of Arizona, I also advocate for all of the roads, state right-of-ways on the Navajo Nation.

And I appreciate the administration, Mr. Halikowski, Mr. Hammit, all the ADOT board members, continue to support and providing guidance and assistance to the project of 191. And I think I've been at this particular request for the past three years or so. Today, I'm sincerely urging and requesting and request for your humble support to add this particular project onto the five-year project, five-year plan. So I just needed to -- I just wanted to be here and formally request for that particular area.

And then on another note, we had the ADOT personnel just came up, Mr. Black -- Blackhorse, to see how the Nation can work with the Arizona Department of Transportation to continue, cooperate, increase and share certain cost share such as tax, HURF money, counties and so on. What's the appropriate way that we could even ask our legislators to help improve not just only a certain part of the regions, but of corner to corner of the state of Arizona, especially all the rural part of the state of Arizona and some of the tribal land where all these state right-of-way lies into.

Also, the previous presenters had also requested for a project for the port of entry in Sanders, Arizona. That's another area that where we will probably pick up to support. As
a Tribal Council member, I sit on the Navajo Nation subcommittee on the state task force for the State of Arizona.

So these are some areas that I would probably sit back down with the State of Arizona, the Transportation Department, to see how we can prioritize all of these particular projects on the Navajo Nation and also work with our regions out of the city of Holbrook.

So all in all, I just ask for your support. I continue to request for your support, and I appreciate your service. And again, thank you very much, and again, I appreciate for the -- for me to have this time. Thank you.

CHAIRMAN SELLERS: Thank you.

Okay. Next is Jemel Horseson, and on deck we have Raymond Smith.

MR. HORSESON: Good morning, everybody. Thank you for allowing me to be here and talk. I'm a commissioner. My name's Jemel Horseson from Nahata Dzill, which is next to Sanders.

Coming here for the ADOT and the need of a POE that would -- a new port of entry. The one that we have is outdated, and it kind of conflicts with the regular public traffic that comes off the freeway at the next exit at Sanders. So it's, like, less than a quarter of a mile, and if the police needs to pull over a trucker that is in violation, they're right at the next exit.
So it creates a conflict with the regular traffic, but also it is (inaudible) that the traffic is increasing from east to westbound it. It goes all the way from California to the east coast, and every day, every night, the traffic is flowing, and the need for that ten-hour time limit that they have, there's nowhere to stay in -- that's what we want to work on. The next available land spot would probably be at Pinta exit. The closer you get to the New Mexico border, there's no land available, and then you also have to get rights from -- permission from the people that live there.

So the next spot that would be feasible would just be Pinta Road exit, and then the exit, it would be a mile west from it so it doesn't conflict with regular traffic. And it's also at a downslope. So it creates a better runoff for the truckers that are coming out from the inspection station.

And also, we need to create a parking lot for truckers to stay at, and there's no -- everything has to be legal. So when the truckers pull off on the exit, it's not a legal trucking spot. So we need to find a way to facilitate and take care of the truckers, the traffic that goes east/westbound, and also the public and the schools like my co-workers were talking about.

So there's a lot of safety issues that we need to address, and I think that we can build -- (inaudible) within reasonable budget and to get this new facility going, and then
the land is available for you guys, that way we can get
something going for the people and just to take care of what we
need to do at Sanders.

Thank you.

CHAIRMAN SELLERS: Thank you.

Next is Raymond Smith.

MR. SMITH: Good morning, Chair and board
members. My name is Raymond Smith, Junior. I'm the Navajo
Nation council delegate for the Sanders and Nahata Dzill area.
I represent Lupton, Houck, Sanders and Wide Ruin and Klagetoh
right along I-40.

I'm here to talk about the relocation of the port
of entry. It is needed. We need to consider that to go to the
Pinta exit. That's a more -- bigger area, and truckers can get
in there and get out.

The other one is that the safety factors in that
area, I-40, as soon as you're turning off, there's an exit right
there at Sanders, and the buses pull in there, and the truckers
try to get on the freeway, and it's kind of like a bottleneck.
So the idea of this moving out to Pinta where it's a whole lot
bigger is a really good idea. So I support that.

The other one, too, is we have the Arizona
priorities that we have submitted through the Navajo Nation
legislation on the transportations. That's regarding the ones
that were spoke by Kee Allen Begay and Taft Blackhorse on behalf
of the road improvements. We support that as Navajo Nation
council, and I thank you for your time on this.

It's imperative that we stand together and talk
about these issues for our people out there as a whole and be
their representative for the Navajo Nation, not only the Navajo
Nation, but Apache County. And also, the counties within the
surrounding area of the northern part of Arizona.

And welcome to the cool weather up here. We're
getting choked over there in Lupton. It is hot, and it --
Lupton's got that smoke, and it's just choking us, and I'm
hoping that the smoke will dissipate now. Last night it was
heavy, and I think I got a touch of asthma, and I didn't get
quite a good night's rest.

But I'm here to represent to Navajo Nation and my
communities. My leaders were just up here talking about it.
They were inspirational about the facts of the port of entry,
and Pinta exit is an excellent place for it. I just drove by
there and saw that, and the area is excellent. So if you guys
can come up, take a look at it and see what we're talking about,
and the egress and -- for the truckers would be perfect for
that.

So thank you for your time, and have a good day
and a wonderful weekend, and happy belated Father's Day, too.
Thank you.

CHAIRMAN SELLERS: Thank you.
Next we have Wayne Lynch.

MR. LYNCH: Good morning, board members. My name is Wayne Lynch. I'm from the Nahata Dzill Commission government. I'm the vice president, and I'm a lifetime resident of Sanders.

And this port of entry was put in when it was still Route 66, and it's long overdue, this port of entry. A few years ago it was funded, but the State couldn't find the land to expand on, but we want to work with the State to put this project in motion. And we have a lot of trucks, and it's just going to get more -- more trucks on that interstate. A lot of them are unsafe. We've been up and down the interstate all the time, and it's a safety issue. We have had a lot of HAZMAT going through there, and we need to make sure our trucks are -- entering our state are safe and secure, and we really appreciate for you to get this on the five-year plan.

We need to get this back in motion. It was funded years ago, but the funding, I guess, went somewhere else. So we really need to move forward with this, and we're willing to work with you on withdrawing that land with the Office of Navajo Indian Hopi Indian Relocation out of Flagstaff. They're the landlords there at this moment, for the purpose of development, and it's a lot easier to get -- go through them. And we'd like to start moving on this.

And appreciate your time, and thank you for
Okay. I have a card from Patti King, who is the executive manager for Pinal Alliance For Economic Growth. She could not attend, but wanted to go on public record supporting the I-10 widening between Casa Grande and Chandler.

Okay. Next up we have the Director's report, for information and discussion only.

MR. HALIKOWSKI: Thank you, Mr. Chairman.

Good morning, board members. Happy to be up here today in the cool weather. I have several items to update the Board on, Mr. Chairman.

My first item is a new style of interchange. I wanted to let you know that Arizona's first full divergent diamond interchange will begin (inaudible) girders for one of the new bridges at I-17 and Happy Valley Road. Work is scheduled for the weekend of June 28th to the 30th. The interchange design has proven popular in other states for efficiently managing traffic flow and improving safety. The interchange being constructed over I-17 at Happy Valley Road is replacing the roundabouts and is expected to ease congestion.

My second item is crash facts. As you know, Arizona annually publishes crash facts through ADOT and its Traffic Systems Management Operations group. Many of the facts
are trending in the right direction, I'm happy to say. Total crashes, serious injuries and alcohol-related fatalities are fewer in 2018 and 2017. Yet overall fatalities have increased to 1,010. This is not moving in the right direction. Pedestrian fatalities especially showed a significant uptick in Arizona.

The third item of interest here today, I think, is summertime construction in the northern part of our state. With the warmer temperatures comes a variety of maintenance and construction projects in higher elevations. I-40 to State Route 89, State Route 89 and other routes will receive pavement treatments or reconstruction this summer. This work, while necessary, unfortunately is going to create some delay for our road trippers.

Number four is dust detection warning system as we're approaching the monsoon season. We've all seen lots of news coverage about that. With the installation nearly complete, ADOT will begin testing the first of its kind dust detection system and warning on I-10 near Picacho Peak. The system uses an array of sensors looking at the road and the sky beyond, and will activate roadway warning signs, institute reduced speed limits or fully close the highway to protect motorists. However, that's not going to halt the ADOT "Pull Aside, Stay Alive" education campaign around the state to emphasize to drivers the true risk of driving in dust storms and
how to stay safe.

Number five is the South Mountain Freeway. As Arizona's first public-private Partnership highway project, the Loop 202 South Mountain will be moving into the final phases of construction. By the end of 2019, traffic will be using some stretches of the 22-mile freeway. Completion is expected in early 2020.

Turning to Interstate 17 improvements, with the funding now available to add a third lane from Anthem to Black Canyon City and funding appropriated by the Legislature to construct two flex lanes from Black Canyon City to Sunset Point, I-17 is in store for some major construction. That construction is slated to begin in 2021 and received a $130 million boost from the State budget process. Until that begins, ADOT and DPS will continue efforts to enhance safety and support motorists, especially during the hot summer months. Design and public involvement processes are currently underway for the project.

The I-10 study through the Gila River Indian Community, in partnership with MAG and the community, ADOT will formally launch the I-10 study south of the valley to examine options for adding capacity. The study will take 18 months and involve outreach with the Gila River Indian Community members, and is supported by a $10 million General Fund allocation approved by the Legislature this year.

On a couple other items not quite closely as
related to highway, MVD mobile. As Motor Vehicle Division offices close in the state for rotation of staff training on the all new computer system that we're going to launch this year, ADOT will pull -- put a mobile office on the road. You will see this converted as a recreational vehicle, and it will provide a range of services to our communities. It will be in Yuma, Mr. Knight, on July 22nd, 26th, and in Flagstaff August 5th and the 9th before traveling to the Navajo Nation for the balance of August.

And my last item, Mr. Chairman, I just wanted to update the Board on the International Border Inspection Qualification Program. ADOT enforcement officers traveling to Mexico are providing training for truck drivers, will be ramping up efforts in interior Mexico to continue with the border qualification process. These trainings and refresher courses allow officers to focus on the higher risk trucks at the Arizona ports of entry. More than 500 Mexican truck drivers have already completed this unique safety inspection program.

That's my report, Mr. Chair.

CHAIRMAN SELLERS: Thank you, Director. Any comments or questions for the director?

Board Member Stratton.

MR. HALIKOWSKI: Mr. Chair, unfortunately as last-minute items, we did not agenda those specific topics, and I believe we cannot have a discussion on those. I guess I'd
look to the Board's attorney on that.

MR. STRATTON: I had a question concerning the
dust, if that would be valid and legal.

MS. KUNZMAN: That -- well, it wasn't on the
agenda, so technically, there can't be discussion.

MR. STRATTON: I can ask after the meeting.

That's fine.

CHAIRMAN SELLERS: Sorry. My agenda said for
information and discussion.

MR. ROEHRICH: It's not my fault.

CHAIRMAN SELLERS: We will now move on to Item
Number 2, the district engineer's report, with Matt Moul, for
information and discussion only.

MR. MOUL: Good morning, Chairman, members of the
Board. I'm Matt Moul, District Engineer for the ADOT Northeast
District. Welcome. Thank you for taking the time to come up.

I'm going to give you a short presentation today
on the projects that we have going on in our district, along
with some work we hope to do in the future.

Our district has nine maintenance units and two
construction offices located strategically throughout the
district. I have a very competent staff that helps me operate
and maintain a little over 3,000 miles of roadway.

The first project I'm going to talk about is the
I-40 Painted Cliffs and Meteor Crater Rest Area project. It's a
$4.5 million rehabilitation project for two aged and deteriorated rest areas. One is located near Meteor Crater. The other is located near Painted Cliffs. It's on I-40 near the New Mexico state line.

The next project is a bridge preservation project. It's to install scour protections on the bridge foundations. It's about $170,000. They're excavating around the foundations, installing scour protection. This project is on Mortensen Wash. It's on Highway 260, located just west of Show Low.

The other two preservation projects, I don't have any pictures for you. Jackrabbit Road to Joseph City. This is a 10-mile long, $10 million preservation project. It's mainly focused on the pavement from just west of Holbrook to Joseph City on Interstate 40. It also is addressing two bridges. It's minor rehabilitation work, barriers and decks. Manila Wash Bridge, and Joseph City Wash Bridge.

The next project is the SR-260 Mainline Road to Overgaard. This project is located in Heber and Overgaard, Arizona. It's seven miles along. It's a limited pavement preservation project. We're going to do some spot milling and then install a full wet seal called a cape seal. That project is $3.2 million.

This project is almost wrapped up. It's the US-60 -- US-160 Chinle Wash Bridge. It's just west of Kayenta,
Arizona. All they have left to do on this project is install the final striping. It cost us just a little over $6 million to complete.

The next project is just north of Kayenta. It's on US-163 at Laguna Creek. It's a $9.5 million bridge replacement project, and they just finished all of the drilled shaft foundations early this week.

We have the SR-377 curve realignment project. It extends from Highway 77 just north of Holbrook, over to highway 77 just -- sorry -- 77 just north of Heber over to 77 south of Holbrook. It's located on Highway 377. It's a $4.5 million project. They're realigning and reconstructing ten horizontal curves for safety purposes to improve the geometry of the roadway and reduce accidents.

Upcoming projects, these are projects we hope to do in the future. We have an HSIP project that's programmed. It's a two-and-a-half-mile-long shoulder widening project from Milepost 450.5 to 453. It's located between the communities of Chinle and Many Farms.

We have a couple of pavement preservation projects. One in US-60 from Show Low to the junction of SR-61, which locals refer to as "the Y." We're hoping do that project soon.

Then the next -- in the next year, we have SR-73 Rim Tank. Rim Tank located roughly halfway between Cedar Creek
and Canyon Day. It will go from Rim Tank all the way into Canyon Day, and that's a mill and fill asphalt project.

We have a scour protection project on the Little Colorado River Bridge. The Little Colorado River Bridge on SR-260 is located just west of Eagar, and this project is very similar to the Mortensen Wash Bridge project. We're going to go in, excavate and install scour protection for the foundations.

Then we have some deck rehabilitation projects. All four of the last projects on my presentation are deck rehabilitations. One is SR-264 at Dennebito Wash. That's just west of Keams Canyon. I-40 near the New Mexico state line, we have the Black Creek and Houck TI bridges. Those are both deck replacements. US-180, east of Holbrook, at Jim Camp and Cottonwood Wash. And then the post office, Canyon Bridge on SR-73 is located just south of the Hon-Dah area.

Anybody have any questions?

CHAIRMAN SELLERS: Any questions or comments from the Board?

MR. MOUL: Okay. Thank you for your time today.

CHAIRMAN SELLERS: Thank you.

We'll now move on to the consent agenda. Does any member want any item removed from the consent?

Do I have a motion to approve the consent agenda as presented?

MR. STRATTON: So moved.
MR. THOMPSON: Second.

CHAIRMAN SELLERS: Motion by Board Member Stratton, seconded by Board Member Thompson. Any discussion?

All in favor.

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Any opposed? The motion passes.

We'll now move on to the financial report, with Kristine Ward. This is for information and discussion only.

MS. WARD: Well, good morning. This is a beautiful area, isn't it? It was just a pleasure coming up here.

So let's see. Chris, what am I doing here? I'm pressing which button? There's lots of button choices. It's like multiple choice gone crazy. The center? Now, don't be a showoff.

All right. I have a very brief report for you this morning, and I am happy to say starting off with -- and that was the wrong button.

CHAIRMAN SELLERS: More instruction.

MS. WARD: There we go. There we go.

All right. Starting off with the Highway User Revenue Fund. I'm happy to report we are back within target range. We are -- unfortunately, May came in 2.2 percent below forecast. We've got -- with $120 million in revenues from May.
Year to date, we are 1.7 percent above forecast. Just under $1.4 billion collected. The kind of unfortunate part of this is our gas tax revenue is only -- we've only got .6 percent year-to-date growth in that. So that's kind of disappointing given the fact that gas tax revenues represent 50 percent of the revenues flowing into HURF.

You know, it's always pleasant to come up and report when your forecasts are almost spot on, and that is where we sit right now with the Regional Area Road Fund. We -- let's see. I pressed a button accidentally. We got 43.5 million in revenues. We're about 1. -- this last month, and this report is for the month of April's numbers. Those are the most current we have available. Year-to-date actuals, we've collected about $388 million, with 6.7 percent growth year to date.

And with that, I really don't have anything further for a federal update or the debt program. We are -- we are in a quiet period, I am happy to report.

With that, I would be happy to take any questions.

CHAIRMAN SELLERS: Any questions for Kristine?

MR. ROEHRIC: Mr. Chair, Kristine, if I could, could you maybe make sure that there's -- any issues that you see as we close out not just the state fiscal year, but the federal fiscal year, and any concerns with any of the federal programs given that we're still on continuing resolutions and
things like that? I mean, is there anything, just maybe comments that the Board may be interested in just to keep them aware of?

MS. WARD: Not at this time, Floyd. No.

MR. ROEHRICH: I'm trying to (inaudible) the Director is --

MS. WARD: Oh, okay.

MR. ROEHRICH: -- (inaudible.)

MS. WARD: Let's see here.

MR. ROEHRICH: You might be back for Item 5.

MS. WARD: Okay. Well, I think I'm -- okay.

This is a new one, Floyd.

MR. ROEHRICH: I was going to make up a wild-ass story (inaudible).

UNIDENTIFIED SPEAKER: (Inaudible) just dance.

MS. WARD: I don't dance in public.

MR. ROEHRICH: So there are no issues closing out the fiscal year. We're on track.

CHAIRMAN SELLERS: Thank you, Kristine.

MS. WARD: Thank you, Mr. Sellers.

MR. HALIKOWSKI: (Inaudible.)

MS. WARD: Wow.

CHAIRMAN SELLERS: Okay. We're now moving on to Agenda Item 5, Greg Byres, for discussion and possible action. This will be for final approval of the 2020 -- 2020-2024
Five-Year Transportation Facilities Construction Program.

MR. HALIKOWSKI: Mr. Chairman, before Greg starts, could I make some comments?

CHAIRMAN SELLERS: Absolutely.

MR. HALIKOWSKI: Thank you, Mr. Chairman.

I appreciate the opportunity to provide the Board and discuss this proposal to add Lion Springs into the five-year plan. You know, the comments from the public are very appreciated, but as you and I and the board members all know, we've been around the state for many years, and we see as it's been said, there often is a lot of need that is outweighing the available funding. And while I sympathize with all of these requests for projects, the reality is that ADOT and the Board are statutorily compelled to follow a data-driven process.

And I think in the discussions we often forget that there are data-driven processes put into places, not just by ADOT, but also by the Board, and these processes are extremely important as we move around the state and hear these various requests.

Mr. Stratton has given me a letter regarding the proposed change, and in that letter he said he was surprised to hear the statute required a report justifying the proposed change. So it got me to thinking that there may be some other statutes that we might want to mention as you're considering this particular issue.
For instance, 28-502 requires us to develop and present to the Board uniform transportation planning practices to be used by the Department. These practices shall be used in the conduct of all studies and analysis relating to any transportation system improvement to be included in the plan and developed pursuant to 28-506.

In 28-503, the performance-based planning and program processes shall provide a means of evaluating the current performance of the plan developed pursuant to 506 and the five-year facilities construction plan developed pursuant to 6951, and for evaluating and prioritizing the proposed changes to the plan and program.

So as we move on, the powers and duties of the Board are to determine this process with respect to transportation facilities using these performance-based methods developed pursuant to Article 7.

So in compliance with these policies established pursuant to 304 under your powers and duties, the Department and the Board shall use the performance-based planning and programming processes in determining the future allocations of the state, federal and financial resources among the Department's major program categories.

I want to just assure the public that the way this looks in real life is it's not that we're trying to put one project over another just on a whimsical issue. We actually
have to use data because of the requests that we see, but also because we're statutorily compelled to do so.

So every year ADOT and the members of the Board, we're working together to prepare a construction program that addresses priority needs based on performance-based planning and programming principles. Now, using these principles, the staff has followed a comprehensive process to rank the individual construction process -- projects using a detailed performance factors evaluation. We've identified the priority projects that match the funding available that we have. Now, after public hearing to gathering comments and inputs from the public, staff and the Board, we finalize these five-year programs and submit to the Governor, and then we as the staff implement them.

During the project evaluation process, and again, during the public hearing process, as you know, many good projects are discussed. We heard some of them today, whether it's US-191, a report for State Route 64 to the Grand Canyon, but under the current funding levels, ADOT cannot at this point consider new system expansion investments outside the MAG and PAG region without underinvesting in preservation and maintenance, and that's the crux of this issue, because underinvestment now is going to lead to worsening pavement and bridge conditions and greatly increase preservation costs in the future, and it's going to sacrifice the long-term health of the existing state highway system.
For years myself, ADOT staff and a number of board members, we've all been talking with state and local leaders about the shortfall of the transportation revenues, and we've made clear the consequences of a preservation-only program.

Now, I feel the message is finally resonating with our elected leaders, as there were a number of transportation revenue bills debated during this past legislative session. Although most of them did not pass, the fact is there's a healthy discussion taking place and positive steps are moving forward.

One of the successes we did realize was the Governor and Legislature providing 35 million in funding for pavement treatment projects that preserve good pavements from deteriorating from poor to fair condition. Any actions I feel that divert funding from the preservation programs undermines the priority of the health of the whole system as prioritized by the Transportation Board, by ADOT the Legislature and the Governor.

As a result, the program presented today is ADOT's recommendation to focus the limited funding resources we have, balancing the State Transportation system needs on preservation, safety and to the extent possible, other needed modernization improvements to the system.

So Mr. Chair, again, we recommend this program
based on the data and the rankings of the process that you and
the Department have adopted, and we follow that, we feel, very
closely to speak with data about what projects should be funded
in the five-year program. So my recommendation is to ask you to
approve the program as it is presented.

Thank you for the time, Mr. Chairman.

CHAIRMAN SELLERS: Thank you.

MR. BYRES: Thank you, Mr. Chairman, board
members. I'm going to go through this. I've got --
unfortunately, my slides aren't matching up with what I've got
in my program here. If I can get some assistance. Got click
happy there.

MR. ROEHRICH: Chris, you've (inaudible) the
state engineer's report, right?

UNIDENTIFIED SPEAKER: I know. There we go.

Come back around.

MR. BYRES: Thank you very much.

MR. ROEHRICH: (Inaudible) the next slide. Why
don't we do that?

MR. BYRES: So we'll go ahead and -- well,
actually, let's go to the next slide.

We're going to go through a series of different
topics here. We're going to go through the general changes to
the Greater Arizona program, projects, adjustments, summary of
comments from the public, requests for approval of the 2020-2024
final program and then next steps.

Next slide.

So as far as the public comments go, we had three news releases that were issued to statewide media. ADOT websites were updated as we went through this entire process. A social media promotion on Facebook and Twitter was performed. We had media interviews. We had a total of 118 SurveyMonkey comments, 64 email comments, as of May 17th, and 61 speakers at public meetings. That's 27 percent increase over last year.

Next.

So thoughts regarding the project-related public comments, the majority of all of the comments came in, we kind of categorized into the I-10 project between Phoenix and Casa Grande, I-17 from Anthem to Sunset Point, I-40, the Kingman Crossing, and Rancho Santa Fe interchanges, US-95 is Yuma to the Yuma Proving Grounds, SR-191 through the Navajo Nation, SR-77 Calle Concordia to Tangerine, the SR-260 Lion Springs section, SR-64 from Williams through Tusayan -- or actually, Tusayan to Grand Canyon. And then we also had some other ones that were considering the Grand Canyon Airport environment, I-10 interchanges and PAG region, I-17 sound walls, and 260 from Heber-Overgaard to Show Low.

Next.

The recommendations that we're putting forth include I-10, and in that I-10 recommendation, we've got -- in
2020, we have $10 million for the study itself. In 2021, we have money for design as well as the MAG region has money in there. And we also have in 2023 50 million for construction. We have a total of 74 million that's being programmed for I-10.

Next.

In I-17, Anthem to Sunset Point, in 2020, we have funding for design, as well as start of construction and expansion. In 2021 we also have construction and expansion moneys. And in 2022, we have construction for the expansion. Total for all of I-17 through the program, we have 323.3 million.

Regarding projects and requests, we also had I-40, the Kingman Crossing and Rancho Santa Fe new interchanges. The Legislature appropriated $20 million for that project with a caveat that Kingman has the money available -- the remaining money available by June 30th of 2024.

On US-95, from Yuma to the Yuma Proving Grounds, the Legislature had a $28 million appropriation that came forth, and one caveat on it is that we encumber some money in the first year, which is in the program to be able to encumber.

And SR-191 through Navajo Nation, safety improvements, there is a project in the tentative program for $2.4 million for the 191 project.

Regarding other projects that were requested in
SR-77, Oracle Road, from Calle Concordia to Tangerine, there's $11 million that's in the program in 2022. That's a pavement pres. project. The SR-260 Lion Springs section is currently not in the tentative program. And the SR-64 Williams to Grand Canyon is also not in the current program.

MR. STRATTON: Mr. Chairman.

CHAIRMAN SELLERS: Board Member Stratton.

MR. STRATTON: If you could go back to the last slide, please. Correct me if I'm wrong, but I believe the Lion Springs is four and a half miles, not two miles.

MR. BYRES: You may be correct. We'll have to take a look at it.

MR. STRATTON: It makes quite a difference when you're looking at 50 million.

MR. BYRES: Yes. So thank you.

MR. ROEHRICH: (Inaudible.)

MR. BYRES: Two miles? We'll take a look at that.

Next slide.

MR. THOMPSON: Greg. Chairman.

CHAIRMAN SELLERS: Board Member Thompson.

MR. THOMPSON: On that -- going back one slide, I always thought that SR-64 Williams to Grand Canyon, I thought it was -- what was the amount that was requested for that?

MR. BYRES: There wasn't a requested amount. It
was a request for a project through --

MR. THOMPSON: Uh-huh. (Inaudible.)

MR. BYRES: We did not approve -- or we did not have any recommendations for projects through that stretch.

As we go through these, we have some proposed expansion projects. So in 2020, we have 10.2 million that's set aside for the Fourth Street Bridge project up in Flagstaff. On US-93, there's 10 million for right-of-way for the West Kingman TI.

For SR-69, we've got 1.3 million for the Prescott Lakes Parkway. That's for right-of-way. And US-93, we have 41 million. That's for the US-93, the gap project. On I-17, we have 15 million for design. That's for Anthem to Sunset Point. There's also $40 million for construction. That's through the legislative appropriation, and there's also 50 million in there that's appropriated through MAG.

Next.

In FY '21, we have -- on SR-69, we have 8.7 million. That's for, again, the Prescott Lakes Parkway. On I-17, we have 62 million. Anthem to Sunset Point, which includes the 45 million, which is part of the legislative appropriation. On I-10, we have $10 million. That's from SR-202 to the SR-387. That's to finish the DCR, the scoping, as well as the environmental assessment for that project. We also have 25 million for US-95, which is the Yuma to Yuma Proving
In FY '22, we're down to one project, which is I-17. There's $65 in that project. That's, again, from Anthem to Sunset Point, with 45 million being the appropriation from the Legislature.

In FY '23, we have 50 million. This is for I-10. This would be at the first segment that is developed through the DCR study that we have coming -- that we are currently putting together for FY '20.

In FY '24, we have 56.2 million that would be going towards the West Kingman TI on US-93.

In our development program, as we go through from 2025 to 2029, again, there's no expansion projects. This is in accordance with the Long Range Transportation Plan recommendations. We have bumped preservation up to 350 million. This is to account for the lack of being able to hit that 320 million in prior years that we were setting as a target. We're now targeting that 350 to hopefully make up for any losses that we may be experiencing as we go forward with the preservation program.

So in the MAG recommendations that we have in the program, again, MAG does its own programming. What we're looking for is the final adjustments coming from MAG in September. That will be after the air quality conformity is complete. The updated MAG program used the absolute latest
costs for construction projects, used the latest project
schedules, and cash flow reviewed by FMS to make sure that we're
fiscally constrained.

I don't have a slide for PAG, but PAG also does
its own programming. PAG has projects on I-10. Also has the 210
project that we're looking at. Also has projects on SR-77 that
are currently programmed.

For our Airport Capital Improvement Program,
we've got -- in the FSL, or the federal match program, we have
$5 million set up for that. In our SL program, which is our
state/local grant program, we have $10 million. For our APMS,
which is the Airport Pavement Management Preservation System, we
have 5.5 million. There's $50 million for Grand Canyon Airport,
as well as 1.1 million for development or studies and so forth
that we have to produce through FAA requirements as well as the
Board's policies.

There's also an additional $10 million that was
appropriated to put into the Aviation Fund, and if you look at
our state -- our SL program, we have $10 million in there. We
actually had $25 million worth of need. So we will take and
continue down our list of projects to accommodate the additional
$10 million that has -- that was appropriated so that we can
keep going as far down the list as we possibly can on our
current needs. So that will get addressed. Those projects as
they come forward will come to this board for approval every
month as we go through those, so...

Next steps. We have -- the program will be delivered to the Governor June 30th, and the fiscal year begins on July 1st.

With that, we bring forth to the Board recommendation of approval of the five-year program.

CHAIRMAN CUTHBERTSON: Okay. I'll open up for comments, questions from the Board.

MR. THOMPSON: Chairman, so once we go into July, we begin the whole process again, have a meeting probably for the next (inaudible) the next five years.

MR. BYRES: Chairman, Board Member Thompson, exactly. We've already actually started some of that process with our P2P.

CHAIRMAN SELLERS: Thank you.

MR. THOMPSON: Thank you.

CHAIRMAN SELLERS: Board Member Hammond.

MR. HAMMOND: A question here. Do we do a motion and a second and then discuss? The agenda says that Board Member Stratton's going to present. Do we listen to Board Member Stratton present first? What's the proper procedure? I think I'd like clarification on that.

MR. HALIKOWSKI: Mr. Chair, if I might, you have to have a program presented on the floor in order to propose an amendment. So first step would be to get the program on the
floor to discuss the amendment.

CHAIRMAN SELLERS: Okay.

MR. KNIGHT: Mr. Chair.

CHAIRMAN SELLERS: Board Member Knight.

MR. KNIGHT: Greg, we deleted a program last time, which -- Bullhead City didn't want a roundabout, and we deleted that. That was 4.7 million, and it had been programmed. I was hoping that perhaps we could repurpose that for a project like -- and it's not anywhere near enough, but apply that money toward a project like Lion Springs or whatever. What's the situation with that?

MR. BYRES: Well, Mr. Chairman, Board Member Knight, when that project was deleted, that was in a PPAC action last month. The funds for that went into Contingency for 2019. So that money has to be spent within 2019. So those contingencies, as a matter of fact, not to say that it went into that contingency money, gets spread out. And I can let somebody else that knows more about it explain exactly where it goes.

MS. WARD: So whenever a project gets delayed or deferred or releases money, or when a project needs money, that flow goes through the Contingency Fund. So if a project was released, the dollars flow back into Contingency and are then applied to other projects as there is need. And so as has come before the Board multiple times, we have had significant -- experienced significant cost increases.
Now, Dallas, I think you just said that this is an HSIP project as well?

MR. HAMMIT: Yes.

MS. WARD: So did that -- I'll let you to speak to that.

MR. ROEHRICH: Please speak into the microphone, Kristine.

MS. WARD: I'm sorry.

MR. HALIKOWSKI: And Dallas, please, for the audience, define what HSIP is.

MR. HAMMIT: Mr. Chairman, Mr. Knight, the funds from that project were from our safety program, HSIP, Highway Safety Improvement Program. When -- that's a specific category of federal funds that have to meet qualifications. So when that money left that project to go to meet those qualifications, it would have to go into another highway safety project to get those funds. So that's where the funds will be reprogrammed. They would not qualify to be used if the project did not meet those requirements.

MR. ELTERS: Mr. Chairman.

CHAIRMAN SELLERS: Thank you.

MR. ELTERS: Mr. Chairman.

CHAIRMAN SELLERS: Yes. Board Member Elters.

MR. ELTERS: Can I ask a question before the motion's made, or would you rather I wait until a motion's on
the floor?

CHAIRMAN CUTHBERTSON: Well, I'm going to have Board Member Stratton speak about his proposed amendment before we have a motion on the -- on the plan.

MR. ELTERS: This is just clarification about what's in the tentative plan.

CHAIRMAN SELLERS: Okay. Please go ahead.

MR. ELTERS: Thank you.

Mr. Byres, looking at the tentative program on page 32, it discusses summary of dollars, and it's looking at statewide subprograms. One of the subprograms is planning to allocate $21.5 million a year from 2020 through 2024. That adds up to a little over $100 million over five years. What will the focus of these planning dollars be, understanding the trend that we are moving forward with, which is mostly system preservation where we're not -- we're doing less and less expansions of corridor?

And I'm mindful as I ask this question of the environmental process and requirements that we can study tier ones all we want. We can't move into project design and delivery until funding streams are attained and recognized. So could you help me understand what the focus of these dollars will be over the next five years, which is a substantial number of dollars?

MR. BYRES: Mr. Chairman, Board Member Elters,
actually, planning, because of the condition of our current
funding becomes more and more important, because now we have to
take our planning down even more significantly than what we used
to in the past where we may have had more funds. We could
generalize a project and put it out. We no longer do that.

We are now taking and identifying projects,
taking and fully scoping those projects, as well as estimating
those projects out so that when they are put into a program,
they're defined correctly so that we don't have extreme cost
overruns. We don't have changes in scope or so forth so that we
can keep within our fiscal constraint on an annual basis.
That's becoming even more and more important.

But the second part of this is that with any kind
of hope, we may actually have additional funding coming forth,
and we need to be prepared to be able to have that accounted
for. So yes, we don't have any expansion projects that are
coming through the program, but that doesn't mean that we don't
take and start -- maintain a plan of action for expansion
projects coming through in the future. Traffic doesn't stop
growing. It's still growing. We still have to account for it,
and we need to know where that money needs to go as best as we
possibly can.

The same holds true for modernization projects in
all of our safety programs. We still have to know what's
happening with -- as crash data comes through, what projects
need to be appropriated or put forth and so forth. So that planning money actually becomes more and more critical as we go forward with the lesser amount of funds that we have.

MR. HALIKOWSKI: Mr. Chair, to that point, if I could. Greg, we gotten have a lot of projects sitting on the shelf right now.

MR. BYRES: No.

MR. HALIKOWSKI: I don't know that we have any projects sitting on the shelves.

MR. BYRES: We have none.

MR. HALIKOWSKI: And if the Board will recall, during President Obama's tenure, we got a $550 stimulus shot to Arizona. Most of that money went into pavement projects, because we didn't have a lot of projects sitting on the shelf. If in the future we're to get some sort of stimulus shot, be it out of Congress or the administration, it does do us well to have some projects ready to go. So part of this money, I'm assuming, also goes towards getting these projects ready should money come in.

MR. BYRES: You're absolutely right.

One of the other things is is the majority of this money is SBR-related funding, which is State planning and research funding. We're mandated to use -- that's 12 percent of the money that comes through -- is it 12 percent? Yeah. 12 percent of the total federal funds that come through have to be
utilized for planning and research. So -- and my division is funded through SBR funds. So it doesn't only cover planning. It also covers our traffic monitoring group. It covers our research group. It covers multiple other groups as well.

CHAIRMAN SELLERS: Thank you.

And certainly it behooves us to have some plans ready if there is ever a federal infrastructure structure plan, although we'll also then have the challenge of matching dollars.

Board Member Stratton.

MR. STRATTON: Thank you, Mr. Chairman.

First I'd like to say I really appreciate the staff and the job they've done on the five-year plan and they do every year, from the Director down to the smallest person that works on this. I truly understand, having been involved in transportation for many years, what a difficult task this is, and by no means do I want my proposed amendment to be a slap in your face or received any other way than just a difference of priorities. I do appreciate what you've done. Thank you.

When I was first appointed by the Governor to this board, as all of us, Mr. Biesty took us around to the Senate, to the Transportation Committee. When I met with Senator Worsely, who was the chairman of the committee at the time, he noticed I was District 4, and more specifically, from Globe. His question to me was, first question, "What do you think about Lion Springs?" I told him that I had been lobbying
for that for many years as my -- with my position at Gila County, and I would -- as an advocate for that project, and I would do whatever I could to help see it funded. That was pretty much the end of our conversation. He was good.

I would also like to reflect to the Board that I've looked at this very hard. I've tried. I met with the Director and Floyd and Kristine last Wednesday, a week ago, to try and look at possible funding options. The first place I went was the 4.7 million that Mr. Knight mentioned a while ago, and was told that it was not programmed.

And later my question was if it wasn't programmed, how could it be a net change to the program that we were presented with during the study session? And I was told then it was programmed in '19 and had to be reallocated in '19. I accept that. I understand that.

My next question was the money that we received from the federal government that we learned about during the work session, 15 million of that was allocated to rural Arizona. I wanted to use that money on Lion Springs project, 5 million for design and 10 million toward construction. We had been told it was put on the bridge for the purpose it had to be parked somewhere, and I understand that. This week I learned that it was not on the bridge, that it was in pavement preservation and parked there.

So I wanted the Board to know and the public to
know that I've tried to look at every option in order not to hit pavement pres. with everything. I understand what the Director is saying and what the Governor's feelings are about pavement preservation. I respect those. However, I feel that it's our duty as board members to listen to our constituents and the public comment and try to do the best we can for those constituents, and that is why I'm proposing the amendment.

The Director did say that I was, in my report, was very surprised, and I am, that 28-6955 existed. I did consult with our legal counsel on how to try and put this report together. There is no case law. Apparently this is the first report. So in some manner we're setting a precedent, and I hope that the review of this report is satisfactory with our legal counsel. She hasn't seen it prior to this morning. We have discussed what I felt would be appropriate to put in the report.

So at this time I would like to read to the public and to the Board. I supplied each one of you with a copy of my report, as well as two copies to the Director, one for himself and one for the Governor if the amendment passes. That is according to this statute. One to our legal counsel, and one for Linda Priano for the record.

At this time -- I'll apologize. I've forgot my cheaters, so I had to borrow my wife's.

Gentlemen, I learned today, June 18th, that according to Statute 28-6955, I must submit a report to the
Director and ultimately to the Governor should the Board approve a change to the five-year plan documenting why I would want to alter the five-year plan that the Director recommended to ADOT Board. I must admit that I was quite surprised by this statute since I nor more any past members whom I contacted were aware that it existed.

Accordingly, I'm submitting the following documents as my report in compliance with that statute.

We received a great deal of public input during the scheduled hearing, public hearings. Fortunately, the majority of the requests were addressed by the passage of the State budget, with the exceptions of the Lion Springs project. This particular project has been in and out of the program for 20-plus years.

I feel that ADOT has created the bottleneck by widening the highway on both sides of Lion Springs section. The only solution to alleviate this problem is to complete the widening of the aforementioned section.

There have been countless accidents, injuries and even deaths due to not having completed what was started. I can't stand idly by and have continued injuries -- excuse me -- and potential loss of life without at least attempting to remedy the problem.

The bottleneck has increased response time for the first responders, not only to accidents, residents and
commercial fires, but also to the potential devastating --
devastation that a catastrophic wildfire can impose.

During my tenure with Gila County, I was part of a team, along with Mr. Sanders, that created a defense program to the potential wildfires after the devastation of the potential bankruptcy of Navajo County resulting from the Rodeio-Chediski Fire. We created a system of ladders and tanks for dips sites for helicopters to fight fires.

I'm going to deviate here for a second. It's a well-known fact by The Forest Service that if you can put a helicopter on a fire within the first 30 minutes of that fire, it is 70 to 90 percent less chance of becoming catastrophic.

The water trucks from Gila County and surrounding jurisdictions supply these bladders with water. During my tenure with the County, it was a major concern that our water trucks would not be able to navigate through the bottleneck to deliver water to the bladders. This is still a concern today, and we have had that problem when I was there.

In closing, I would like to assure you that I'm not proposing this project because it's in my district, but for the safety of the motoring public and the greater good of Arizona.

As promised, enclosed you will find a copy of the email sent to me by Floyd Roehrich, a letter from the Tonto national supervisor, which I will read, and copies of the public
comments which I have highlighted concerning Lion Springs.

Thank you for allowing me the opportunity to explain my thought process and reasoning for the proposed amendment.

Neil Bosworth, the Tonto National Forest supervisor has signed this letter. He's asked me to read it into the record and as part of my report, because all of their people are allocated to the Woodbury Fire at this time.

Dear Committee Members: The Tonto National Forest strongly supports the proposed State Route 260 highway widening project known as the Lion Springs project. The section of highway that would be improved by the Lion Springs project is located on Tonto National Forest lands, and the Forest has expressed continued support of this project and other 260 projects that have been implemented to improve traveler safety and address increased traffic volumes.

We understand that this project would reach ADOT's goal of completing a four-lane divided highway along the entire SR-260 corridor, and as a result would have a positive -- broad positive impact both locally and regionally. At the same time, it would have positive effects on forest lands surrounding the highway the following ways:

Protection of watershed and wildlife habitats. Reduced erosion. Reduced wildlife and vehicular collisions. Protections against forest fires. And there are details on each
one of those, but in the matter -- interest of time, I will skip the detail.

In addition to the improved resource protection, the Forest Service supports this project as SR-260 is a gateway to numerous high-use recreation sites and activities on both the Tonto and Apache-Sitgreaves National Forest. These sites include developed and dispersed camping, important trailheads, fish hatcheries, lakes popular for fishing and boating, prime hunting areas, and creeks popular for swimming and daily use activities.

This project would improve the public's experience in visiting or traveling through federal lands by eliminating traffic delays that occur as SR-260 changes from a four-lane divided highway to a two-lane highway within the Lion Springs project area.

Additionally, the Lion Springs section of SR-260 would connect two sections of highway that are currently suitable for bicycle traffic. The improved access for this portion of central Arizona and reduced congestion would contribute to the region's economic development by further leveraging the federal land resource available to the public.

Finally, the final environmental impact statement and record of decision for the project are complete, and timely completion of design and construction would reduce the need for future re-evaluation.
In recognition of the numerous benefits of completing the Lion Springs project, the Tonto National Forest will pursue all opportunities for supplemental funding as allowed by our regulation and policy in cooperation with ADOT efforts.

And he lists his name and number if there's any questions to contact him.

When I received the amendment, it wasn't exactly as what we had spoke about, and it was due to the monetary changes that I mentioned. I did commit in that meeting with staff that I would ask The Forest Service to look for money if we approved this or we didn't to try and help us and alleviate the funding by ADOT. This is the highest ranking person in Tonto National Forest. Neil Bosworth. He's made that commitment in writing.

So at this time I would make a motion that we amend the five-year plan to include Lion Springs project, with the design in year '20, and the construction to begin no later than the second quarter of 2022. Whatever is easiest for the staff for cash flowing purposes and amending the five-year plan.

I make that. I know the amendment says to begin construction in '21, but I believe that I don't want to tie our staff's hands. I believe it's appropriate to give them what leeway we can, but I also believe that I would like to see that project started before I leave the Board, which will be at the
end of '22.

I state that as a motion, Mr. Chair.

CHAIRMAN SELLERS: Okay. We have a motion for amendment to the five-year plan. Do we have a second?

MR. KNIGHT: Second.

CHAIRMAN SELLERS: Second from Board Member Knight. Any other discussion from board members?

MR. THOMPSON: Chairman, for the purpose of maybe finding some additional resources mentioned here, I've got a couple of questions and regarding how tightly the money that's been set aside for I-10 study? And the second is the Contingency Fund. I would need further explanation and how that could also be one of the options. Those are my questions.

MR. HALIKOWSKI: Thank you, Mr. Chair and Mr. Thompson. So there's a couple things wrapped up in here. First of all, I'm a little confused by the motion to amend the five-year plan, because it sounds -- and I may be mistaken here -- nothing specific was put in there as to what we're not going to do in order to fund Lion Springs. It's being left up to the staff.

And I will tell you from my perspective, as I've already discussed, the staff and the Board have the duty to follow a data-driven process. So far, we've followed that process, and Lion Springs ranks number 38. Again, while I sympathize with all of the issues, I have to look at this from a
So in answer to your question, Mr. Thompson, when you say how tight is the money, I don't know if that's in relationship to fully funding Lion Springs, because you're talking about $50 million. As far as the Contingency Fund, Kristine can come back up and reiterate what we talked about with the Contingency Fund.

I'm not sure how to answer your first question on the tightness of the funding. But once again, I also think we need to talk about some specificity of what the Board wants to remove from the program in order to fund Lion Springs, and I'm a little confused since I haven't heard what that is.

MR. STRATTON: Mr. Chairman, if I may.

CHAIRMAN SELLERS: Board Member Stratton.

MR. STRATTON: Forgive me for not being more specific. As in talking with the legal counsel about that particular subject, it is not exactly for the Board to pick project by project. Rather I would say the lowest ranking pavement preservation projects in the plan, and I do believe that it should be in the same split in rural Arizona as the freeway to rural roads are.

MR. HALIKOWSKI: With respect, Mr. Chairman, it's interesting to me that the legal counsel is saying you're not to pick project by project, but that's, in fact, exactly what we're doing in picking the Lion Springs project to reinert it, and
I'm puzzled as to the Board's reasoning of following the data-driven process on all the other projects we've presented in the five-year plan for your approval, but for some reason, this one's being inserted. But on the other hand, we're being asked to go ahead and pick lower ranking projects. So again, there is some confusion here, at least is my understanding, of how this process is working, and your legal advice of the Board not picking and choosing projects, because, in fact, that's exactly what we're doing here today.

CHAIRMAN SELLERS: Board Member Hammond.

MR. HAMMOND: I think if Board Member Stratton were to tell me how he thought I'd vote on this issue, he probably knows I would not support the amendment, which is -- you know, these are all my friends. We all want to help each other. I don't know how passage of this amendment could not be perceived as a favor to one district over a very detailed, time consuming, hours driven process over six months of coming up with a five-year plan.

I'll tell you, if I'm the lone "no" vote, I'm not going to take my marbles and go home. I'll move on, and it's okay. I just -- I just don't think it's the right decision. And I'm not saying that for my district or anybody else's district. I'm saying it for the State, and I actually believe if we were to do something like this, and it -- and it happens, I think it even hurts District 4 in the long term.
If we do a perceived favor -- by the way, I absolutely am in favor of this project, but if we override a data-driven process for a subjective decision for one district, what happens next year? What happens the year after that? How do we as non-technicians make that decision to pull one project out to support another?

A unintended consequence that I haven't heard but just kind of nagged at me also is if we as non-technicians pull data-driven projects out of the system, and one of those projects, it doesn't happen that year, somebody dies on, what kind of liability increase do we have when we don't -- whether we get asked that question. How did you make that choice? If it's data driven, we've got an argument. If it was perceived to be subjective, I think we have an unintended consequence and increased liability.

That's probably secondary, though, to the idea that the data needs to drive the decision making. I want to see this project back in. It doesn't -- I mean, we're sitting here because of lack of funding. You heard just today, every one of the speakers quoted safety. In some respects, we decide who lives and dies on our highways. Every day somebody dies on our highways, and we get a lawsuit. Whether it's I-10, whether it's -- you name it. All these projects throughout the state, all this pavement preservation is a safety issue, and we make those choices, and if that's not data driven, I feel very -- when
somebody dies on the system, I would hate to think it was because of a subjective decision. I would want it to be a very objective decision.

You know, the time to get this project and all these projects into the plan was during that six months. I didn't hear it today, but I did hear over the months that hundreds, maybe even thousands of changes were made to that five-year plan based upon all of the input. Did everybody get what they want? No. But that is the product of lack of money and lack of the -- lack of ability to do what we need to do as a state. I mean, I want to vote for this. I really do, but I just think it's not the right decision, and so I can't support it.

CHAIRMAN SELLERS: Board Member Thompson.

MR. THOMPSON: Chairman, I guess the other option, I think, no matter how much I try to understand the whole process, I still have to ask here and there, I do appreciate all the input and administration you have put out. I think this discussion is very respectful.

And that the other option I'm looking at is that what's the possibility of trimming the existing projects that we have to begin bringing the resources that would apply to this particular project? And this was already accepted into the program, and I feel that it's still there. During the 2019, 2023, and it was mentioned by Board Member Stratton that it's
been going over 20 years. And my mindset, that is still there.
The recommendation to us is to change that. Am I understanding
that right or (inaudible) you know?

MR. HALIKOWSKI: Mr. Chairman, Mr. Thompson, I
think you fully understand the recommendation is to change it,
but I think this -- some people in this audience will remember
years ago this plan was not fiscally constrained. There were
many projects put into this plan over the years that cost, for
example, 50 million, or 5 million might have been parked there
just to assuage someone to say it's in the five-year program.
When I came on board, in working with the FMS staff, we put a
stop to that practice. This plan must be fiscally constrained.

The other thing the Board has adopted based on
our recommendations are strict policies of procedures as to how
we pick and choose programs -- or projects through the priority
programming process. In fact, the law requires us to do that.
And so once again, we have done to the best of our ability to
bring you a plan according to the processes and procedures that
we've all agreed on.

Unfortunately, rebalancing has been a sad fact of
life for the past ten years due to the economy. I don't care
whether it's ADOT, whether it's MAG, whether it's PAG. Due to
the downturn in the economy that we experienced in '08, '09 and
'10, we're still recovering from that, and as MAG will tell you,
they had to move probably billions of dollars in projects out of
their five-year program.

So the point is is that things do move in and out based on changes in what's financially available, and also based on changes that we've adopted and refined over the past ten years of how we pick projects. I'm not saying Lion Springs isn't a worthy project, but I have to say that about every project as I travel around the state and am asked by people when they say, this is the most dangerous stretch of highway or this is the most important project of the state. This will provide great economic benefit. This will be an improvement in safety.

I can't respond to each of those. What I have to use is a very data-driven process to decide with limiting funding available what to present to you that in our best professional engineering judgment is what we should be doing for the next five years.

Mr. Chair, we go back to Kristine. There was a prior question on the floor about contingency funding.

MS. WARD: Mr. Sellers, Mr. Thompson, I believe your question was -- and please, let me repeat it back to you. It's been a little bit. Okay. I would appreciate it if you could -- I'll try and repeat your question, and let me know if it's correct. You asked if there were any available -- extra available dollars in the program. Is that how tight the program is?

MR. THOMPSON: Specifically, the Contingency
Funds, how -- if there's any, and how that we could reach into that particular can.

    MS. WARD:  Okay.  Let's start with part one.

When we do the initial programming, the very first step in developing the tentative five-year program is for us to do the revenue forecasts on which that program is based. When I come to you every month and I say we are within target range, if we start going -- the purpose of that is to communicate to you that the revenues are flowing at the estimates that we originally based the program on.

    So what has happened is I -- at the beginning of this programming cycle, FMS, Financial Management Services, provided MPD the revenue forecasts, and those revenue forecasts provide the constraint, the bounds within which the program can be developed. So -- and we program -- we develop projects or the project plan to expend the entirety of those dollars. We do not -- we do not keep -- we do not have, unfortunately, a mystery bucket of money that I can just magically, like Lucky Charms, pull from.

    And so when you ask me how tight is the program, is it fully -- is it -- excuse me -- fully programmed? It is. We have planned for every dollar that we have forecasted.

    Now, let me move on to -- oh, I'm sorry. Do you have a question, sir?

    CHAIRMAN SELLERS:  No.  Go ahead.
MS. WARD: So let me move on to Contingency.

At the beginning of each year, when we develop the program, it's in the tentative program right now, you will find a Contingency Fund. I actually think you'll find two. And you'll see $5 million programmed for Contingency. That fund, that -- it's not really a fund. That subprogram is like a clearinghouse. As projects -- it's funds that set aside that if projects come in over budget, we draw from that five million. When projects come in under budget, we put the dollars back into that subprogram. So it ends up going around kind of like a washing machine. Does that -- does that make sense? Does that -- am I communicating that well?

There are not -- when we come to the end of the year, if there are, say, extra -- a few extra dollars, which we don't encounter terribly frequently, what we do is I pay the bills ahead just a little on the -- I use those dollars up. I soak them up, and I pay for projects that you've -- you, this board, has already programmed, has already approved to pay those projects, pay the bills a little early.

What that does is then frees up those dollars for you to reprogram in the subsequent year. But I need -- for fiscal constraint, I need that Contingency Fund for the entirety of the year, because what happens is I can't predict, particularly in the environment that we find ourselves now, with ever-rising costs, I cannot predict when Dallas and company are
going to come through the door and say, we've got a project that is running over.

I believe that I would open it up for any questions if -- I hope that got -- answered your question.

CHAIRMAN SELLERS: Thank you.

MR. HALIKOWSKI: Mr. Chairman, Mr. Thompson as another question on how tight the money is on I-10. I don't know if Dallas or Greg wants to address that, but I think there's money set aside for the I-10 project. His question was how tight that is.

MR. BYRES: For the I-10 project, we currently had -- there was $10 million that came in through a legislative appropriation. We already had some funding in there, as well as in this tentative program for the study, as well as $50 million out for construction in 2023. That -- until the DCR is done, we don't know what that first segment's going to be. So that $50 million is somewhat of a placeholder, but it's nowhere near enough money to be able to do even what needs to be done through the entire project. The entire project of I-10 is somewhere in the neighborhood of about $320 million, just to widen one lane in each direction from the 202 to 387. So is the money tight on I-10? It's extremely tight, because we don't even have the money yet appropriated to do the entire project.

MS. WARD: If I may?

MR. BYRES: Yes.
MS. WARD: With regards to the tightness on I-10, this is a discussion, you know, when -- there is -- you're going to just love this word again. There is a process for estimating projects. When the planning to programming, P2P, process does that prioritization, I-10 came up, I believe, as number two. We are doing -- we are going to scope the project, I-10 project, to the level of funding we have.

So I don't want you to think that we have underestimated a series of projects and built them into the program. That would absolutely violate fiscal constraint. There are circumstances where we will -- if we find that we have less money available, we scope the project to fit the money that we have available. But the key has got to be that we adhere to fiscal constraint through that process.

MR. ELTERS: Mr. Chairman (inaudible).

CHAIRMAN SELLERS: Board Member Elters.

MR. ELTERS: So I've been thinking about this long and hard, and I've been listening here today. Let me just start by acknowledging the effort that has been made to date by the Department and the P2P process. And understanding fully that it's a process that is being improved and evolving and tweaked, as I've thought about it back and forth, especially this week when I saw the follow-up related to the amendment, and how I would approach it, it occurred to me it's no different today than it was before, and in my mind, it's never been to
turn off one faucet while the other one is turned on. It's a balancing act. It has always been and will always -- has always been and will always be in my mind.

The hierarchy of the system that we have, interstates, U.S. highways, state routes, is all related, and it's all connected, and the interstates connect to the U.S. highways and state routes, and we have regional corridors and so on.

I think the intent is to do what we can, not to bias one or favor the other, but to do what we can to address needs where needs are needed. We've done so on other corridors before. When US-93 needed funding, the State funded US-93, because those were the needs, and a substantial amount of funds went to improve that corridor and address the number of fatalities and remove crosses from that.

When needs were warranted on SR-191, improvements were made to address that. SR-260 as well, improvements were made over the years. In fact, that's how the Lion Springs became the bottleneck that it is.

So saying -- you know, I find myself debating against myself to tell you the truth in a lot of situations, because while I say that --

MR. HALIKOWSKI: Welcome to my world.

MR. ELTERS: I'm sorry?

MR. HALIKOWSKI: Welcome to my world.
MR. ELTERS: So the issue is real, and I have no doubt that every comment and every assessment that has been made has been an honest and sincere. And the effort that has been made is objective in nature. But again, I keep going back to is there a room? What can we do to balance? Clearly there is a need here, and there's a need to preserve the system around the state, and I don't mean pavement versus bridge. It's system preservation. And I think there's no doubt this Board is sincere and real, committed to preserving the system, because we voted on this long-range plan that trended in the direction of system preservation and less of everything else.

But I think even the day we voted on it, we voted with the understanding that something would happen that it would not be a complete drying up period. There would be some balancing, some change. So I don't know if you've counted how many times I've used the word "balancing," but if I'm not up to 15 yet, I will get there.

My point is whether it's -- I -- personally, I hasten to say it needs to come from A or B or C and how you do it, because this is not about second-guessing or overlooking your effort. This is about recognizing and voting what we know best in our -- our abilities, our conscience, our perspective.

And to that end, I truly believe Lion Springs, even all of the testimony we've heard related to emergency
response and safety and crashes and so on, needs to find its way back into the program. Whether it's designed one year and built over one year or two years or however that is figured out, I favor a -- an -- and support an approach that would -- that would proceed in that direction.

MR. HALIKOWSKI: Mr. --

MR. ELTERS: So, you know, I -- it boils down to it's a corridor that's been improved in the past. This would complete the original intent of the environmental document and process. It doesn't have to be done, in my humble opinion -- no disrespect to any of my colleagues -- doesn't have to be done in year '21 or '20 or '22. But we want to ramp up the system preservation to address the system. That number, where it lands, in my opinion, has some flexibility to accommodate what I'm suggesting here.

So I'm -- I -- as long as balance is the goal here, I think I'm leaning more to supporting the amendment than not (inaudible).

CHAIRMAN SELLERS: Okay. I need to make a comment here, because my understanding of our process is that for us to make an amendment like this to the five-year plan, we would have to specifically identify where the money is coming from in the plan. And since we don't have that today, I don't think we can make that decision today.

MS. KUNZMAN: That's correct.
MS. WARD: I defer to the attorney on this (inaudible).

CHAIRMAN SELLERS: And I want to add to that that I agree with what I'm hearing from the other board members here that this is a critical project. You know, I've heard about this for the entire time I've been on the Board. I think it's a safety issue. I think that we need to address this. We need to find a way to get it into the plan. I don't think we can do that today.

MS. KUNZMAN: I see a few -- this is Michelle Kunzman. I see a few puzzled looks. Do you want me to, Mr. Chair, just sort of explain from a statutory perspective where we sit today with respect --

CHAIRMAN SELLERS: Please. You don't think I'm an attorney?

MS. KUNZMAN: Are you?

CHAIRMAN SELLERS: No.

MS. KUNZMAN: Oh. Feel free. So I just want to clarify for the Board, obviously we have priorities in terms of time frame, and so there is a statute, as Mr. Stratton mentioned. What I want to clarify is that the motions that you have before you, you have a motion and a second. It isn't sufficient the way it stands to give direction to staff or the Governor on what the actual plan is.
So even though, Mr. Stratton, you don't have to have specific details in what you're proposing, the statute does require that the actual plan does. So if you're proposing to put Lion Springs back into the plan, somehow you need to identify what's going to give. So whether that requires more discussion with staff, discussion in this open meeting. I just wanted to clarify the current motion that is before you isn't sufficient to give staff direction on how to put Lion Springs back into the plan.

Does that make sense? Do you have any questions about that?

CHAIRMAN SELLERS: Board Member Stratton.

MR. STRATTON: Thank you, Mr. Chairman.

As we spoke on the phone, my understanding was -- is that if it -- the motion said to take it from pavement preservation, that was specific enough, and it was up to the staff to make those adjustments in the pavement preservation program to fund Lion Springs.

MS. KUNZMAN: What my suggestion would be is if that's what the Board wants to do is that you don't actually make a decision about it until you actually know what preservation would be affected. And if you look at the statute, there is a point at which if the Department actually has made a decision about what the priorities are, and they've made a decision that Lion Springs can't be part of the five-year plan,
then it does become the Board's responsibility to identify what parts of the current plan need to be bumped in order to make Lion Springs part of the plan.

MR. STRATTON: This is completely different from the legal advice I received.

MS. KUNZMAN: I don't believe so, but I wanted to make sure that our conversation was on the record.

It's not -- you're putting forth a proposal, and you're telling the staff that you want it to come -- the money to come from preservation. So in order for us to actually know what that means, we need to get the information and have it on the record as to what -- what parts are going to be bumped. So it's not Steve Stratton making that decision, but the Board has to have on the record what the plan is going to look like, the details of the plan. So I'm -- what I'm clarifying is, Steve, is that our discussion was you, Steve Stratton, are not making a decision, because actually, a Board has to vote on it, right?

MR. STRATTON: Yes. My question to you when we spoke was do I have to specifically name projects, and the answer was no.

MS. KUNZMAN: Correct, because Steve Stratton doesn't have to make that decision, but the Board as a whole has to identify what the amendment is. So if I wasn't clear with that, that's what I was trying to convey.

MR. STRATTON: We have never received the
rankings on any of the pavement preservation projects, so it's hard to say -- for us to say this or that.

MS. KUNZMAN: Right. Right, and --

MR. STRATTON: When they say these are the highest daily, you know, whatever, but to go down a list, I don't have a list, and I don't believe any of the Board has a list as to saying what project ranks are.

CHAIRMAN SELLERS: Can I interject --

MS. KUNZMAN: And I think that -- I'm sorry. Go ahead.

CHAIRMAN SELLERS: Can I interject a quick question here? If we don't approve this amendment today, can we amend the five-year plan at a future Board meeting?

MR. ROEHRICH: Mr. Chair, Mr. Sellers, we have --

MR. HALIKOWSKI: (Inaudible.)

MS. KUNZMAN: Go ahead.

MR. HALIKOWSKI: No. We'd like the Board's attorney to answer that as a matter of law.

MS. KUNZMAN: I am not going to answer the question in front of the public. Go ahead and answer the question.

MR. STRATTON: Well, then we may need to go into executive session.

MS. KUNZMAN: If you want to go into executive session, we can. I would advise the Board to not have legal
argument in front of the public.

CHAIRMAN SELLERS: Okay. I guess my concern is that there seems to be confusion around what we're trying to do today and what our options are, and so I -- I'm just asking if there's a way to defer this, but not for a whole year.

MS. KUNZMAN: Well, the statute does provide for you to be able to make amendments to the five-year plan, so...

MR. HAMMOND: Chairman, you know, it would seem to me -- I mean, there's a lot of support here for Lion Springs. That's obvious. But I'm not hearing anything other than we probably need to approve this plan, and if we want to put it back in there during the next go-around, we do that with staff and find a way to make it data driven, not that we manipulate the data, but we've got to get -- well, I don't know. I don't know. See, that's where I'm struggling here a little bit, is if I go against data, then I have a lot of responsibility with a subjective decision like that on what happens out there on our highways.

MR. HALIKOWSKI: A couple --

MR. HAMMOND: And that's the primary reason why I would vote no.

MR. HALIKOWSKI: Mr. Chairman, a couple points is that there is a ranking list. We'll be happy to share it with you. I'm surprised we haven't already. But my question also becomes, you know, without manipulating the data, if Lion
Springs is down in the 30s on this, and you decide to move it up, what do I do with all of the other projects that were deemed to be worthier than that, even though in your minds, and I hear Board Member Elters saying that it's his gut feeling and a good decision, but I've got 30 other projects in front of it that are data driven for funding.

So once again, I mean, it becomes very difficult based upon the statutes and policies that the Board's adopted to provide a data-driven plan to simply pluck something from this far back in the pack, regardless of whether it was in it before and move it up.

So I do want to add one more comment, and that's I want to thank Mr. Stratton. I mean, he's worked very hard with us, and in an incredibly and respectful manner, and this is not an us against him type thing or an emotional thing. I just want to thank him for the respect he's shown the staff as he's trying to wade through this and do what he believes is right in his heart. We just have a difference of opinion on how to administer this, Mr. Chairman.

MR. ELTERS: Mr. Chairman, the discussion here today really, in my mind, clearly shows that we do not as board members fully understand the what, when and how, and it would have been no -- not passing judgment, not criticizing of any kind, just for the future, probably would be helpful to explain, and perhaps both discussions could happen at the study sessions
that we do prior to adoption of the program.

The other comment that I do want to make is that
the Department works really hard on system preservation to
program three years, not five years in advance. So I don't know
what this motion -- how this motion stands. If, indeed, it is
in that -- after the third year, because then you're not getting
into project specific, because there's no projects specifically
programmed at that time in the system preservation (inaudible).

MR. HALIKOWSKI: And Mr. Chairman, Mr. Elters,
the reason we're having this discussion is the last version of
the amendment as I saw it specifically did name projects to pull
out of the five-year plan. I thought that's where we were
heading today. But it also specified design and construction
dates, and I believe those were in the next three years. So
that version's the last version I saw while going off of today.
So when you talk about pavement pres. being three to five years
out not being programmed, we were not (inaudible) on that
assumption.

MR. ELTERS: No. I understand, and I'm not
changing the amendment. I'm trying to clarify the discussion
that is in front of us. If, indeed, the concern is if the
pavement preservation or the system preservation funds are
impacted, they would be impacted in -- related to a specific
project if they are in the first, second or third year. If they
are beyond that, they're not impacting specific projects,
because those specific projects have not been named yet.

So -- and probably a last thought, and that is our system is a complex system that has a hierarchy of corridors that carry 200,000 vehicles or better a day, and some that carry 10,000 vehicles a day. I realize that the performance criteria that you have in place does its best to address those -- to accommodate for that. But the -- both corridors are important to our -- equally important to this network of transportation that moves us and our goods and services around the state.

So right now, if you look, you've got interstate, interstate, interstate as one, two and three, and that is because they are important. No doubt about it. But other corridors are equally as important, and we've got to figure out a way to address them as well. That's where I'm coming from, and that's what you'll hear me repeatedly say.

MR. ROEHRICH: Mr. Chair, Mr. Elters, we'd agree with that, and as we had said in January, in the first study session when we laid out the priority, we actually did look at a project list of priority. Those things were presented, and we identified where the funding went. The criteria is a balance of the high capacity corridors, key commerce corridors, the local (inaudible), the rural corridors, the urban corridors. All that is accounted for in the evaluation process as well.

What we continue to struggle with obviously is the fact that we have to draw a line on priority projects,
because that's not enough money to do everything, and that's where the hard decisions end up having to be made.

If we are going to move forward with this motion I really would like to have it restated, because I'm not quite sure what it is. But I do have a concern of what the Director had brought up, and that is, Mr. Stratton, in your motion you said specifically you want design out and construction to start no later than the second quarter. I don't remember what year it was. We never put that in our program, that specific what the delivery is, because we don't know what design challenges, what clearance challenges, what other conditions are going to happen within that, which is why every month we come to the Board with recommended changes to the specific projects.

So I want to make sure that whatever motion we get to, as led by the Board's attorney, to make sure that it is legal and it's in full. Again, doesn't tie our hands to the point where we can't deliver that. And then it does look like we're, you know, not able to develop either a fiscally constrained program or a program that is deliverable.

MR. STRATTON: Mr. Chair.

CHAIRMAN SELLERS: Board Member Stratton.

MR. STRATTON: Thank you.

I'll address two things. First, the Director's statement about the amendment. The last version we saw was very project specific. I haven't seen that, and I apologize if I
missed it somewhere. So this is what I have, what you sent me. I never, to my knowledge, received anything that was project specific other than pavement preservation as a full swath. I want to clarify that. Otherwise, if there was, then I wouldn't be here. I'd be talking about project specific now, but I never received that.

MR. HALIKOWSKI: And my apologies. We had looked at a list. I'm sorry. That was not part of the amendment. You are correct, sir.

MR. STRATTON: So then I should understand that the Department has looked at a list of projects who have to fall off the pavement pres. if the Board approves this Lion Springs project?

MR. HALIKOWSKI: Well, Mr. Chairman, Mr. Stratton in accordance with the statute, if the Board is to ask us to look at this, then yes, we would have to look at specific projects.

MR. STRATTON: And I'm asking have you already looked at a list of projects?

MR. HALIKOWSKI: We have had discussions based on your request, yes.

MR. STRATTON: Secondly, to Floyd's point about specifically the year and the date for construction and design. When I met with you guys, we discussed the timeline for the design, and it appeared to be that one year was an agreeable
number. One to two years was an agreeable number. And that is why I stated my motion as I did, to give you the flexibility, the design to begin the first year of the new program, but that if you needed the two years to get it done, that would give you until the second quarter, which is a year and a half to two years to start the construction. But it appeared to be a consensus among us that there was a very good possibility that it would be completed in a year, because as, of course, the supervisor mentioned, the environmental and such has been done already and accepted.

MR. HALIKOWSKI: Yeah. I'd like the state engineer to answer that question if it is a question.

MR. HAMMIT: Mr. Chairman, Mr. Stratton, there was an environmental document done. It is more than -- it's pushing 20 years. There would definitely have to be an environmental reevaluation. So it would take time. We're looking at two years to do that.

There's right-of-way. The majority of it is forest, but there is some public land, and we would have to purchase that right-of-way. That also takes time. And you have to be at a certain level of design before you can purchase or identify exact limits.

MR. STRATTON: Would it then be inappropriate to give you the latitude to say for design to begin in the first year, and the construction would follow as the design is
MR. HAMMIT: Mr. Chairman, Mr. Stratton, if it would move forward with this project, giving us two years is something we could deliver. Doing it in one year, I don't think we could deliver with all the challenges of this project.

MR. STRATTON: Understood and completely understand that. Thank you.

MR. HAMMIT: And Mr. Chairman, if I may, there was some question on the preservation program. I do have numbers if the Board would like that.

CHAIRMAN SELLERS: Please.

MR. HAMMIT: In 2022, right now there is $148 million programmed for pavement -- excuse me -- 164 million for pavement preservation. Right now, there are nine projects identified, and there is 17 million left in the subprogram. Of those nine projects, five are on the interstate, four are on state routes, and that is just going through the printed program that you got a copy of.

In 2023, there's 182 million. Right now we've -- like Mr. -- Member Elters said, there's only one project been identified. The rest is in the subprogram. So if that helps the Board with information.

MR. ROEHRICH: So I guess, Mr. Chair, board members, Dallas, what he's saying is we've been trying to get up to 300 million. We're not even up to 200 million. We keep
falling short of our goal, which continues to push us behind in
system preservation.

MR. HAMMIT: Mr. Chairman, Floyd, that is
correct.

MR. ELTERS: Mr. Chairman.

CHAIRMAN SELLERS: Board Member Elters.

MR. ELTERS: Dallas, I must have heard you
incorrectly. That was pavement preservation, right?

MR. HAMMIT: Mr. Chairman, Mr. Elters, that is
correct.

MR. ELTERS: There is also money in bridge
preservation. Is that not the case?

MR. HAMMIT: Mr. Chairman, Mr. Elters, that is
correct.

MR. ELTERS: (Inaudible.)

MR. HAMMIT: I have not gone through the detail
of all of those, either pavement preservation. There's a lot
more bridge projects, but they're smaller dollars. So that --
we could put that together, but I didn't have that in front of
me.

MR. ELTERS: The reason why I asked is I was
under the impression that we were in 50 to 60 range for system
preservation in the current five-year program. And it would be
great to understand if that is really an accurate understanding
or if I'm off, and if I'm off, which way and where it is,
actually. Again, it -- you know, we're all trying to do the
best that we know how and to have an information that we can
rely on is key to that (inaudible). Thank you.

MR. HAMMIT: And Mr. Chair, Mr. Elters, that has
been our goal. We've never got up to that goal of getting there
because of different things have happened, usually a capacity
project.

Thank you.

MR. STRATTON: Mr. Chairman.

CHAIRMAN SELLERS: Board Member.

MR. STRATTON: Dallas, I have another question.

Have you identified $50 million worth of pavement preservation
projects in adjustment should this amendment pass?

MR. HAMMIT: Mr. Chairman, Mr. Stratton, I have
not. I have a list of projects, and I could start going from
the bottom of the ranking, but -- and get to $50 million. But
when our total is 164, we're basically taking a third of our
pavement preservation projects for one year out of the program.

But we -- I know that the projects that have been
identified, those nine that are in the program that is the
tentative program that you have, and we could take that ranking,
and it's the same ranking that staff presented in the one-on-one
meetings. It had a ranking of the top 20 in each of the
categories. That's where that number's come from.

MR. HALIKOWSKI: So Mr. Chairman, this is where
it gets difficult, to Mr. Elters' point, because I'm not sure
that just taking the lowest ranking and bumping them off is
really the way to do this, because as Mr. Elters pointed out,
you know, there are other intangible factors as to what the most
important projects are, what our conscience tells us we should
do, what our gut tells us we should do. And that sort of
becomes very difficult to say you just bump the lowest off, or
are you going to take some other sort of matrix or formula and
try to decide out of those 9, 12, 13, 30, which one should come
out in order to do that.

MR. ELTERS: Mr. Chairman.

CHAIRMAN SELLERS: Board Member Elters.

MR. ELTERS: It seems like the whole discussion
is focusing on the preservation simply because that's the only
place we all recognize there's some flexibility. I am not --
this is not an amendment to the motion. It's not a motion in
itself. It's just pointing out my perspective, and that is if
indeed this was to happen, it would have to happen in more than
one year. Bringing 50 -- 40, $50 million to fund this project
is better, more tenable to have it happen over multiple years,
because the impact would be less, and it would be spread out.

Again, I realize it -- but we -- you know, we've
-- we're doing it on I-17, and we're doing it on I-10 where
we -- you know, we say we have X dollars coming from this agency
and Y dollar comes from that agency, and we're going to do this
in this year and that in that year. So to try to, again, facilitate the delivery of these projects and improvements, it's one way of doing it. At least that's the way I envision it, and I truly believe it's needed, but I don't really feel it's reasonable to take it to take the big $50 million in one year of system preservation to deliver it. So if there is a way to spread that would be more conducive, I think, to carrying it forward.

MR. HALIKOWSKI: Mr. Chairman, I've asked Kristine to come up, because I don't think the I-17 project's an accurate comparison to this, and I know we've discussed spreading this project over years, but I believe it's problematic to do a spreading.

MR. HAMMIT: Mr. Chairman, Mr. Elters, Director, one way to keep me out of trouble with Kristine that we could do it, and I don't think it's an efficient way, we'd have to scope if we say we're going to do 25 million and 25 million, I would have to have two projects to say 25 million built -- determine and scope of project to build it that way, and then have it in the next year.

We kind of did that when we planned the original. We had a really big corridor, and we broke it up into segments. Now we're just over two miles. I did some quick calcs. The four miles that was in the DCR included work that's already been done at Preacher Canyon with the bridge. So that's why it's a
little less on this. But we're just between two and a half miles or so by my quick calculations this morning.

To break that up would be difficult and then also, have two different contractors potentially working is a challenge, unless there was another way money could come in. But to do it fiscally constrained, my understanding, we'd have to have a project for the money we program in one year, and a project for the next year.

CHAIRMAN SELLERS: Board Member Stratton.

MR. STRATTON: My understanding from the meeting I had with staff was that -- kind of an answer to Mr. -- Board Member Elters' statement, I asked to have it done over two years, and for that very reason, and the answer I received was it had to be obligated in the first year, but it would cash flow over two years; is that correct?

MS. WARD: We actually need to get the amount that we are going to -- we are going -- I'm sorry. We need the project size fully funded within the year it's going to take place. That -- so if we are going to break the -- if we are going to break those costs up -- excuse me, Mr. -- Chairman Sellers, Mr. Elters. If we are going to break the project up, we're going to adjust the scope of the project. So we will break the scope up into that first year to ensure we have full funding within the first year. We will break the scope up into the second year to have it fully funded in the second year.
When we went back and looked at this, it was just not -- it's not feasible. I already have cash flow underlying in this -- in this programming. So the way to make this happen, if you want to split it over the years, is to scope the project so you have the funding within the year it's needed. Does that kind of make sense?

MR. HAMMOND: Mr. Chairman.

CHAIRMAN SELLERS: Board Member Hammond.

MR. HAMMOND: This is kind of a question of clarification. I mean, $50 million has got to come from somewhere. So if it comes out of the pavement preservation, that basically means it comes out of, I guess, all our districts in some way, shape or form. Do the district engineers of this P2P process have -- are all these pavement preservation projects that trickle up through the system in their plan, assuming we go forward? Because they've been identified and we're suggesting funding in this five-year plan?

MR. BYRES: Chairman, Mr. Hammond, yes. The district engineers are -- the districts are very prevalent in P2P. They have a big portion of the four different sections -- or the four different categories in which each of the projects is scored. So yes, they do have.

CHAIRMAN SELLERS: Just a little bit of clarification, I guess, on something Board Member Hammond said. He said the preservation money comes from all the districts.
Are we divided by district? Is preservation statewide?

MR. ROEHRICH: Mr. Chair, Mr. Sellers, the pavement preservation program as well is broken down between MAG PAG and Greater Arizona. And again, when we bring the projects and identify, that's where it's determined what projects are done that year. So it's not equally divided around the 13 other counties in Greater Arizona. It depends upon the system need. So northwestern state might get a few more projects this year, southeastern state may get a few more projects, central region may get a few more projects outside of Maricopa County. It depends on the ranking that year for the rest of the statewide portion.

CHAIRMAN SELLERS: I guess that was my point is that Districts 1 and 2 are really separate from the other districts when you talk about pavement preservation.

MR. ROEHRICH: It's separate from the statewide pavement preservation dollar amount, but they get preservation funds.

CHAIRMAN SELLERS: Exactly. But what I'm saying is that if money was going to be taken from pavement preservation for this project, it comes out of --

MR. ROEHRICH: Mr. Sellers, that's exactly right. If we're putting in a $50 million new project, 50 million is done without a preservation. At some time, as projects either roll along or until we get to the point where in the future we
hit that subprogram that hasn't been identified yet, it's coming out of the Greater Arizona portion.

CHAIRMAN SELLERS: So for that reason, I try to defer to the other districts rather than make a decision that really doesn't have an impact on District 1 or District 2's pavement preservation.

MR. HALIKOWSKI: And Mr. Chairman, Greg, we've been focused on pavement preservation. Are there any capital projects in Greater Arizona that we considered bumping off to do Lion Springs?

MR. BYRES: Mr. Chairman, Director, at this point in time, (inaudible) whole lot of details as to which projects or what kind of project. There has to be some rationale put together as to what we're looking at touching. To just kind of willy-nilly go out and start picking projects, we need to have true rationale, just like the P2P process has rationale to make sure that this is the most economic, has the least impact to the State as we go through it and try and make these adjustments.

CHAIRMAN SELLERS: Well, and I think that's really where I'm coming down in the comments I've made this morning is that I'm extremely supportive of this Lion Springs project, but I'm not sure I -- that I understand that we've done enough research to know where the money would come from to support it and what gets impacted by doing it. I'd like to see that detail.
MR. ELTERS: Mr. Chairman, just one more process related question if I could.

CHAIRMAN SELLERS: Okay.

MR. ELTERS: And again, not to prolong the meeting. It's gone on long enough. But I really -- I'm trying to understand. Based on past understanding and practice and what I'm looking at here, and please understand I am fully supportive of the I-17 corridor and what is planned for it. This is isn't about questioning it. But in the I-17, we have construction dollars under (inaudible) programmed in 2020, 2021 and 2022. It's not one year. It's not two years. It's three years. That is a practice that I'm familiar with from the past that has occurred for as long as I know.

So I don't really -- and again, I'm not challenging you, Kristine, or the staff. I'm just trying to understand what is the difference between that, this, what I'm looking at here for I-17, and funding Lion Springs or any other project of over multiple years? I'm truly confused by it, and sooner or later we probably need to understand it, so at least for future exercises.

MR. KNIGHT: Mr. Chair.

CHAIRMAN SELLERS: Board Member Knight.

MR. KNIGHT: I'm a little confused, too, because Dallas has said that it was going to be three years before the environmental study had to be relooked at. So it's going to --
two to three years before -- I would take that to mean it would be two to three years before we would be able to move a shovel and dirt, but before construction could start.

So I'm having trouble, as Mr. Elters, why it all has to happen in one year when we're looking at two or three years before construction could start.

MR. HAMMIT: Mr. Chairman, Mr. Knight, it would be two years for the design and development. We would fund the development, the design, the environmental as one, as Mr. Stratton had said. And then in the construction year, that's when we would fund the remaining. So that's why it was a 5 and a 45 million to total the 50.

So the first part, we can't -- my -- we can't fund construction one year and then roll it over into the next year to build it up. You know, we just can't say -- you know, it's like at home, if I need to do something, I save it over one year and do something else. We're not allowed to do that, because we have to obligate those funds, because they -- most of our federal funds, we have to obligate them, and they have to be done in the fiscal year. Does that make sense?

MR. KNIGHT: Well, back to Mr. Elters' question. But that's what's happening with I-17.

MR. HAMMIT: I-17 is -- Mr. Chairman, Mr. Knight, is a $300 million corridor. We haven't selected every project -- that can be done in multiple projects if there's not
a way to advance funds or do something else. Right now, there are not specific -- the specific projects that have been identified are the flex lanes to the north, and those can be funded in one project, and then the other funds. So I would need my financial person before I practice without a license here.

CHAIRMAN SELLERS: It sounds like maybe we need a study session on this, because I'm getting more confused the more I hear.

MR. HALIKOWSKI: Well, because, Mr. Chairman, as you'll recall, we had enough money working with MAG to go from Anthem to Black Canyon City. We since have had that infusion of State cash. So the dynamic keeps changing on the dollars that are available.

CHAIRMAN SELLERS: Like with South Mountain, you know, we combined 22 miles into a single project, and it's spread over several years. I don't think that whole amount was dedicated in the first year.

MS. WARD: Mr. Chairman, you are correct. It was not identified in the full -- all in one year. We did not program 2.1 billion in one year. The project was such that we could scope it down, and we knew how much would land in each year.

This project, what we're talking about is just identifying the scope that will be completed in a given year,
and that is how much we will obligate. Dallas' point with
regards to you can't roll dollars over, the difficulty here is
the Greater Arizona is more than 75 percent reliant on federal
dollars.

You go into the MAG region, you've got many, many
more fund sources that could help you flow dollars and move
between fund sources, because those dollars are more easily able
to transition from one year to the next.

With regards to Greater Arizona, we do not have
that flexibility, and it becomes very, very difficult to make
sure we do not end up in a lose -- you know, we've got a
use-or-lose situation. It's very difficult to make sure we
don't lose a federal dollar. So when we build the program,
particularly when it comes to those projects that are almost
exclusively federally funded, we book them all in a year or we
scope the project.

Does that answer your question, sir?

CHAIRMAN SELLERS: Thank you.

MR. STRATTON: Mr. Chairman, I have a question
for Mr. Byres.

CHAIRMAN CUTHBERTSON: Board Member Stratton.

MR. STRATTON: I have a question for Mr. Byres,
please.

In your previous trip to the podium, I believe
you said you had looked at what project would be eliminated if
this passed; is that correct?

MR. BYRES: We've looked at multiple projects.

MR. STRATTON: How many projects is it?

MR. BYRES: Altogether, there was -- I think we've considered six projects over a three-year period.

MR. STRATTON: And are all those pavement preservation projects?

MR. BYRES: Yes.

MR. STRATTON: I'd like to amend my motion, Mr. Chair.

CHAIRMAN SELLERS: Okay.

MR. STRATTON: Or make a new motion, whichever is appropriate. I would like to make a motion that we fund Lion Springs. We start the design the first year of the five-year program, and the construction would be begin when the design is done, therefore not tying the staff's hands, and eliminate the projects that Mr. Byres just said they had focused on, the six projects, in order to fund that. And those are all pavement preservation projects.

CHAIRMAN SELLERS: Do I have a second?

MR. KNIGHT: Second.

CHAIRMAN SELLERS: I have a motion and a second.

Discussion?

I have a question. Would it require eliminating all six projects to do that?
MR. HALIKOWSKI: Well, even before we get to that, Mr. Chairman, I think the way the statute is worded, the Board is supposed to make a request of us to study this, and we're supposed to come back again with specific projects.

CHAIRMAN SELLERS: Okay.

MR. HALIKOWSKI: We've had a number of projects under discussion based on Mr. Stratton's request. Decisions have not been made on those, and I would respectfully request that we bring those back to the Board, because as Greg has just said, we can't just sort of willy-nilly make a decision. We need to justify those using the data and come back to you for your approval. I'd be much more comfortable with us doing that so the Board can approve the elimination of those projects, so that when we have to go out and explain that your pavement project is not going to happen, this was because of the Board's decision to move it to Lion Springs.

CHAIRMAN SELLERS: Okay. Board Member Hammond.

MR. HALIKOWSKI: You might ask your legal counsel to comment on that.

CHAIRMAN SELLERS: You know, let's -- let me just ask this question, because I don't have any problem putting Lion Springs book into the five-year plan. But it seems to me we've got to approve this plan, unless we've got some sort of legal grounds and path to not approve it or amend it at this meeting, and I'm not sure we do. I don't have a problem with approving
the plan with the direction to come back to us on how we put --
maybe the next study session or something. How we put this --
what are the good, bad and ugly of putting this back into the
plan? And have a debate at that time. I just -- this seems
just weird to me to pass this motion as it's stated. It just
doesn't seem legally sound, I guess, for lack of a better word.

MR. STRATTON: Has the statute become -- somewhat
evolving here. I'm learning more and more after each motion, I
guess. This time it isn't more statutes and the recommendation.
So I will gladly remove that motion from the floor. And at this
point, let's -- we have until the first of July to deliver this
plan to the Governor; is that correct?

MR. ROEHRICH: Mr. Chair, Mr. Stratton, it's due
to the Governor on -- on or before June 30th of each year.

MR. STRATTON: Thank you.

Would it be possible to receive the
recommendations from the staff the first part of next week?

MR. HALIKOWSKI: I don't know the answer to that,
Mr. Chair.

MR. STRATTON: At this point I really don't want
this to approve -- I don't -- will not vote to approve the plan
as it sits today. I would be willing to table the plan and ask
the staff to get us their recommendation according to statute
and have a special meeting to look at the five-year plan.

MR. HALIKOWSKI: Unfortunately, my attorney's not
here today, so I have to turn to the Board's attorney. Have we received a formal request by the Board to study this? Because as you pointed out earlier, we received a request from Board Member Stratton, but if I'm recalling the wording correctly, the Board has to make this request to go and study this. And again, if I remember correctly, we have to return with something to the Board to approve, correct?

MS. KUNZMAN: Yes. I mean, I think we have a motion on the table. If you want to amend your motion to actually request that, and then the Board can vote on that.

MR. STRATTON: I do make that motion, that we ask the staff to look at the projects that would be their recommendation that would be affected if we added the Lion Springs project, and to table the approval of the five-year plan until such time that we have that information, and have a special meeting to approve the five-year plan at that time or disapprove it.

MR. HAMMOND: Can I ask a question? This isn't all by 12 days from now, is it?

MR. ROEHRICH: Mr. Chair and Mr. Hammond, yes, we would have to do all this and schedule another meeting before the 30th of this month.

MR. ELTERS: Mr. Chair --

MR. HAMMOND: Well, maybe the Board will be excited about this, but I probably wouldn't be at that board
meeting. I'll be in Canada.

MR. ELTERS: Mr. Chairman.

CHAIRMAN SELLERS: Board Member Elters.

MR. ELTERS: We seem to be an at impasse. It's critical, I think, to -- to approve and adopt a five-year program in time and move it forward. With the -- I say that with the understanding that as a board, and with the ability to request an agenda item, we could request an agenda item next month or the month after to come back with this very information, and then to amend the five-year, we -- just as we adopt it today -- and I'm looking at legal counsel to make sure that I'm not presenting something to the Board that is inaccurate and incorrect. But if we adopt -- if we adopt the five-year program today, so it moves forward without delays, and in a month or two from now, so we're not rushing staff or ourselves, we ask for this information, and we come back and think it through, whether it's through a study session or a board meeting. Can we not then amend the five-year program and then resend it to the Governor should that be necessary? I'm just recognizing what's in front of us and trying to move in a prudent manner.

MR. HALIKOWSKI: Right. Mr. Chairman, Mr. Elters, I appreciate that. It does give us, I think, much more time, because when I started out as an intern in the Legislature in 1989, Polly Rosenbaum, who was from Gila County,
always told us, "Legislate in haste, repent in leisure." And so I think scheduling this a month and away gives us much more time to produce recommendations that are based on data for you to consider. So although I don't have a vote, Mr. Chairman, I'll vote for that.

CHAIRMAN SELLERS: And certainly that would make me more comfortable. I think I alluded to that earlier, asking if we could approve the five-year plan today and then amend it at a future meeting. So that being said, Board Member Stratton.

MR. STRATTON: With the understanding that the five-year plan can be amended at a future date, I would make a motion we approve the five-year plan with that stipulation and understanding.

CHAIRMAN SELLERS: Okay. We have a motion on the floor; is that correct?

MS. KUNZMAN: So if he withdraws --

CHAIRMAN SELLERS: Withdraw your first motion.

MR. STRATTON: I withdraw my first motion.

CHAIRMAN SELLERS: Okay.

MR. STRATTON: And second and third.

(Inaudible.)

MR. ROEHRICH: (Inaudible) could you withdraw all four of them?

MR. STRATTON: All except the last one.

MR. KNIGHT: I'll withdraw all my seconds.
CHAIRMAN SELLERS: So your last --

MR. STRATTON: My last motion, for clarification, would be to approve the five-year plan as presented with the understanding that if the Board so chose to at a future meeting, that we could amend that five-year plan to include the Lion Springs project if we so desired.

MR. KNIGHT: I'll second that. That's enough.

Stop taking.

CHAIRMAN SELLERS: Okay. We have a motion and a second. Discussion?

MR. THOMPSON: Chairman, I do agree with the motion and second. One thing I'm thinking about right now is that going back and still trying to do catch up, 2019, 2023, 5 million identified for design, 45 million in 2023. During that period, the funds were already obligated. So the public needs to know what happened to that. So I guess to comment something and talk about, you know, I do agree (inaudible).

MR. ROEHRICH: Well, Mr. Chairman, Mr. Thompson, I think we're mixing terms here. The funds were programmed at the time as a future project, and then this year when we updated the program, as we do every year, we work with the Board, we update the program, we reevaluate, and we look at -- for any new projects, and priorities were brought in that forced that out. So the money was never obligated. It was programmed. And we went through the public hearing process so the public could see
that that change was made and the Board could see that change was made as well.

CHAIRMAN SELLERS: Okay. Any other comments or discussion?

UNIDENTIFIED SPEAKER: Question?

CHAIRMAN SELLERS: Question.

MR. STRATTON: Yes. I'll defer to my attorney.

MS. KUNZMAN: Thank you, Mr. Chair, Mr. Sellers -- or Mr. Sellers, Mr. Stratton.

I think we may want to consider revising your motion, and here's why. I apologize. I think that the way it's phrased right now contingent on revising the plan to include Lion Springs may be a little bit ambiguous, because then what if there's another -- I think it would probably be better to adopt the plan the way it is, and then if the Board wants to set a special session or if you want to amend it at a later date, you can do that. But to actually have that be part of the motion, I'm concerned that there might be -- it might be ambiguous.

MR. STRATTON: And I'm not -- I didn't say contingent, I don't believe. I hope I didn't. If I did, I apologize. I tried not to use that word, but maybe --

MS. KUNZMAN: You didn't use that word, but that was the first thing that went to my mind, and so it's --

MR. STRATTON: I'm just asking with the understanding that the five-year plan can be amended.
MR. HALIKOWSKI: Well, could I split this up and maybe help out here? First, if the Board could make the motion to direct the Department to go and study alternatives to funding Lion Springs and present those to the Board no later than July 30th of this year, and then the Board can make a separate motion to adopt the five-year plan cleanly, knowing that your motion has directed us to come back to you with the study by July 30th.

MS. KUNZMAN: Thank you, Director.

MR. HALIKOWSKI: You're welcome.

MS. KUNZMAN: You should be up here.

MR. HAMMOND: I'll second your motion, Steve.

MR. STRATTON: So moved.

UNIDENTIFIED SPEAKER: So did you withdraw --

MR. STRATTON: Withdraw my first one --

CHAIRMAN SELLERS: And you withdrew your second. You made that motion, and you seconded that motion. You get all that, Linda?

MS. PRIANO: Who seconded it?

CHAIRMAN SELLERS: Board Member Hammond.

CHAIRMAN SELLERS: Okay. Any further discussion? All in favor.

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: All opposed? The motion carries.
MR. HAMMOND: Does that count for the five-year plan, too?

CHAIRMAN SELLERS: No. Now we need a motion --

MR. ROEHRICH: Now we need a five-year plan.

That was -- thank you, Mr. Chair, Mr. Hammond. We took that as the motion to direct staff to evaluate the five-year program, to bring back the discussion before July 30th on the program impacts to add the Lion Springs project.

CHAIRMAN SELLERS: So now I would entertain a motion to approve --

MR. HAMMOND: Okay.

CHAIRMAN SELLERS: -- the five-year plan as presented.

UNIDENTIFIED SPEAKER: Mr. Chair.

MR. ELTERS: I so move.

CHAIRMAN SELLERS: Moved by Board Member Elters.

MR. KNIGHT: Second.

CHAIRMAN SELLERS: Second by Board Member Knight.

Any discussion? All in favor.

BOARD MEMBERS: Aye.

MR. HALIKOWSKI: Thank you, Mr. Chair.

And special thanks to you, Mr. Stratton. You have been really good to work with. I appreciate that.
MR. STRATTON: I appreciate the staff working with me, and again, it has nothing to do with staff's recommendations other than I feel it necessary to make this.

Thank you.

CHAIRMAN SELLERS: Okay. We will now move to Agenda Item No. 6. Mr. Byres. This is for information and discussion only.

MR. ROEHRICH: (Inaudible.)

MR. BYRES: Mr. Chairman, board members, the only thing I have to report is it looks like we have some work ahead of us, so we're going to be working on that. Other than that, we have started some work on our P2P process for the next year, and we're pretty much just going through that, trying to get you this program is what we've been concentrating on. That's all I have.

CHAIRMAN SELLERS: Very good. Okay. We'll now move to Item No. 7. Mr. Byres. This is for discussion and possible action. Priority Planning Advisory Committee items.

MR. BYRES: Mr. Chairman, board members, the PPAC committee brings forth -- we've got a total of -- we have ten projects -- or actually, a total of -- well, ten projects coming forth in front of you. The first set of projects are project modifications. Those are Items 7A through 7E, and we bring those forward with a recommendation for approval.
CHAIRMAN SELLERS: Is there a motion to approve PPAC project modifications Items 7A through 7E?

MR. THOMPSON: So moved.

MR. KNIGHT: So moved.

CHAIRMAN SELLERS: Moved by Board Member Thompson.

MR. KNIGHT: Second.

CHAIRMAN SELLERS: Second by Board Member Knight.

Any discussion?

All in favor.

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Opposed? The motion carries.

MR. BYRES: The next set of projects we bring forth are Items 7F through 7H. These are new projects. Then again, we bring these forward with a recommendation for approval.

CHAIRMAN SELLERS: Is there a motion to approve PPAC new project Items 7F through 7H?

MR. KNIGHT: So moved.

CHAIRMAN SELLERS: Moved by Board Member Knight.

MR. ELTERS: Second.

CHAIRMAN SELLERS: Second by Board Member Elters.

Any discussion?

All in favor.

BOARD MEMBERS: Aye.
CHAIRMAN SELLERS: Opposed? The motion carries.

MR. BYRES: Mr. Chairman, the next project we bring forward is an airport project for approval. This is a new project -- or excuse me. This isn't a new project. This was actually a federal grant project that we're bringing forward that is funded through the Aviation Fund. And again, we bring this forward with a recommendation for approval.

CHAIRMAN SELLERS: Is there a motion to approve --

MR. STRATTON: So moved.

CHAIRMAN SELLERS: -- ESP Item 7J?

MR. STRATTON: So moved.

MR. THOMPSON: Second.

CHAIRMAN SELLERS: Moved by Board Member Stratton, second by Board Member Thompson. Any discussion?

MS. PRIANO: Excuse me. That was item 7I. The airport project.

MR. BYRES: 7I.

CHAIRMAN SELLERS: Oh, okay. I'm sorry. I jumped. Trying to get done.

Okay. Project 7I, moved by Board Member Stratton, second by Board Member Thompson. Any discussion?

All approve, aye.

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Opposed? Motion carries.
All right. Now.

MR. BYRES: Mr. Chairman, board members, the next item is 7J. This is the Economic Strength Projects that we're bringing forth. We have a total of four projects for the City of Casa Grande, Town of Snowflake, City of Kingman and the City of Sedona. It's the total of $1.425 million, and we bring this forward with a recommendation for approval.

CHAIRMAN SELLERS: Is there a motion approve ESP Item 7J?

MR. KNIGHT: So moved.

CHAIRMAN SELLERS: Moved by Board Member Knight.

MR. THOMPSON: Second.

CHAIRMAN SELLERS: Second by board member Thompson. Any discussion?

Approval, say "aye."

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Opposed? The motion carries.

MR. BYRES: Thank you.

CHAIRMAN SELLERS: Thank you, sir.

Moving on to Agenda Item 8. State engineer's report for information and discussion only. Dallas.

MR. HAMMIT: Mr. Chairman, currently we have 102 projects under construction totaling $1.919 billion. In May we finalized six projects totaling 80.2 million, and year to date we have finalized 92 projects. (Inaudible) on the state
CHAIRMAN SELLERS: Thank you.

Any questions, discussion?

Moving on to Agenda Item 9, construction contracts, for discussion and possible action.

MR. HAMMIT: Thank you, Mr. Chair, and thank you, Board, for approving the item on the consent agenda.

We have five items that we need to discuss.

Looking at the spreadsheet that you can see, year to date, we have contracted for -- assuming today's projects go through -- 600 -- basically, $609 million. The States's estimate was 524. Prices have gone up. We've been underestimating a total of about $85 million, or 16.2 percent. So that is a trend we're working with our estimating, but the prices are still what they are. So even if we -- upper estimates, we're losing ground in cost.

Item Number 9A, Mr. Chairman, that is a project -- this is on I-10 over the Deck Park Tunnel. We have a leak over the tunnel. It is right now a nuisance, but we need to fix it before it becomes a problem. We put this out. The low bid was $2,902,747. Our estimate was 1,268,590. We believe we didn't -- right now we're not 100 percent sure where the leak is. We believe we need to scope that more to get a better price. We would request the Board to reject -- we only had one bidder as well -- the bid and have -- we will bring it back for
a future time.

CHAIRMAN SELLERS: Is there a motion to reject bid for Item 9A?

MR. ELTERS: So moved.

CHAIRMAN SELLERS: Motion by Board Member Elters.

MR. KNIGHT: Second.

CHAIRMAN SELLERS: Second by Board Member Knight.

Any discussion?

All in favor.

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Opposed? The motions carries.

MR. HAMMIT: Thank you, Mr. Chair.

Item 9B, this is a project on 260 in Show Low.

Last month this project was postponed. The low bid was $4,747,992. The State's estimate was $4,974,359. The low bidder on this project failed to meet their obligations for the paperwork for their DBE goals. The number two bidder did not submit their information for DBE goals. The number three bidder is approximately a million dollars higher. In addition, because we had to go through that process, we would have a two-season job. Staff is recommending that we reject all bids, put it out. We will do the job next year where we can do it all in one season, and we believe we can get a better price.

CHAIRMAN SELLERS: Is there a motion to reject all bids for Item 9B?
MR. THOMPSON: One question. Dallas, can you explain this DBE?

MR. HAMMIT: Mr. Chairman, Member Thompson, the DBE is Disadvantaged Business Enterprise. It -- there were some paperwork that each bidder is required to submit. The low bidder in this case, when they submitted their paperwork, they had errors that caused it to be rejected. Every bidder is required to submit the paperwork, if you're the low bidder or the fifth bidder. The second bidder chose -- I didn't get the job. They made a decision not to submit the paperwork. Everyone is supposed to, but there's not a penalty if you don't, other than if we throw out the first one, you're not eligible to be awarded if you don't turn in your paperwork.

MR. THOMPSON: They will be notified?

MR. HAMMIT: Everyone has been notified. Everyone was given a chance to appeal the process, and we had no appeals on the process.

MR. THOMPSON: But then I'd like to move for rejection.

CHAIRMAN SELLERS: Okay. Motion by Board Member Thompson.

MR. STRATTON: Second.

CHAIRMAN SELLERS: Second by Board Member Stratton. Any discussion?

All in favor say "aye."
Item 9C, this is a roadway widening and bridge replacement on State Route 86. The low bid was $13,870,714. The State's estimate was 10,421,178. It was over the State's estimate by $3,449,536, or 33.1 percent. We saw higher-than-expected pricing in a roadway excavation, our aggregate base, asphaltic concrete. And when we dug into it deeper, it was the location and the haul. They were going to have to mobilize and haul the material and the water a great distance. We have reviewed the bid and believe it is a responsive and responsible bid and would recommend award to Granite Construction Company.

CHAIRMAN SELLERS: Is there a motion to award Item 9C to Granite Construction Company as presented?

MR. HAMMOND: So moved.

CHAIRMAN SELLERS: Moved by Board Member Hammond.

MR. THOMPSON: Second.

CHAIRMAN SELLERS: Second by Board Member Thompson. Any discussion?

All in favor say "aye."

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Opposed? The motion carries.

MR. HAMMIT: Thank you, Mr. Chair.
Item 9D, this is a local project, a pedestrian bridge in the town of Wellton. The low bid was $1,049,988. The State's estimate was $745,718. It was over the State's estimate by $304,271, or 40.8 percent. We saw higher-than-expected pricing in excavation, the drilled shafts for the bridge, immobilization. They were mobilizing in from -- the low bid from the Phoenix area. They sought further men and equipment. We have contacted the local community. They will make up the difference in funds. So with that, the Department believes the bid is responsive and responsible and would recommend award to DBA Construction, Inc.

CHAIRMAN SELLERS: Is there a motion to award Item 9D to DBA Construction, Inc. as presented?

MR. KNIGHT: So moved.

CHAIRMAN SELLERS: Motion by Board Member Knight.

MR. STRATTON: Second.

CHAIRMAN SELLERS: Second by Board Member Stratton. Any discussion?

All in favor say "aye."

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Opposed? The motion carries.

MR. HAMMIT: Thank you, Mr. Chair.

Our last item is Item 9E. This is, again, a local project in the city of Prescott. The low bid was $497,770. The State's estimate was $406,079. It was over the
State's estimate by $91,692, or 22.6 percent. We had higher-than-expected pricing for the grading, for pavement, and the construction of sidewalk. Again, we did contact the local community. They will cover the additional Funds since this is a local project. The Department has reviewed the bid and believes it is a responsive and responsible bid and recommends award to Fann Construction, Inc.

CHAIRMAN SELLERS: Is there a motion to award Item 9E to Fann Contracting, Incorporated, as presented?

MR. KNIGHT: So moved.

MR. HAMMOND: Second.

CHAIRMAN SELLERS: Motion by Board Member Knight, second by Board Member Hammond. Any discussion? All in favor say aye.

BOARD MEMBERS: Aye.

CHAIRMAN SELLERS: Any opposed? The motion carries.

MR. HAMMIT: Thank you, Mr. Chair.

CHAIRMAN SELLERS: Thank you, Dallas.

Okay. Moving to our final agenda item. Agenda Item 10. Are there any suggestions from the Board for future agenda items?

MR. KNIGHT: Mr. Chair.

CHAIRMAN SELLERS: Board Member Knight.

MR. KNIGHT: After today, I would like to see on
a future agenda, for a future item on possibly the August study session what it could like look for the Board to be involved in the initial planning for five-year program -- the five-year plan, how we could be involved in the initial -- a discussion how we could be involved in that initial planning for the five-year program since it's already begun to start.

It seems like we don't even get an input until you've already put it all -- and I certainly respect all the expertise and all the work that goes into it, but it seems like we don't even see it until it's done, and we have really no input into anything that goes into it, and I'd just like to have discussion as to what that could look like.

MR. ROEHRIC: Mr. Chair, (inaudible.)

CHAIRMAN SELLERS: Okay.

MR. KNIGHT: And Mr. Chair, one other item. I did bring up previously at a prior meeting about median barriers. If Floyd could let us know where we're at with that.

MR. ROEHRIC: So Mr. Chair, Mr. Knight, I know a few months ago you brought up wanting to have a board discussion on that topic, and at the time I had mentioned that we've got a number of litigations ongoing regarding that specific topic or that specific element, and that we would not be prepared to do that -- to discuss that topic at this time.

A general discussion of the highway strategic -- or the strategic highway safety plan and maybe how we address
safety in our evaluation process would be appropriate, but on a specific topic such as median crossovers and those accidents, we would not be prepared to discuss that topic while litigation is ongoing.

MR. KNIGHT: Great. Thank you.

And I will say that I was unaware of -- being the newest member on the board at this point, I was unaware of the litigation that was currently going on or had probably -- I fully realize that we can't discuss ongoing litigation. So I fully understand your position, and I probably would not have asked for it until after all the lawsuits have been settled, and that may be the appropriate time.

MR. ROEHRICH: Mr. Chair and all the Board members, please, never hesitate to ask us about a topic. We absolutely want to be prepared to address topics. And if we have a condition or concern or some element of that, we will discuss with you that specifically. So do not hesitate to ask.

CHAIRMAN SELLERS: Thank you.

Anything else from the Board?

MR. ELTERS: Mr. Chairman, one more item.

CHAIRMAN SELLERS: Okay.

MR. ELTERS: In light of the discussion --

CHAIRMAN SELLERS: Just one. That's it.

MR. ELTERS: One. That's it for me.

In light of the discussion today and the fact
that I, and I trust probably at least one other board member
learned something about the statutes that dictate the Board's
deliberation process. And I -- I'm not an attorney. I don't
pretend to be. It would be, I think, helpful, in all honesty,
to spend a few minutes or a half hour meeting with counsel,
spend a few minutes with us, walking us through those statutes
that do apply. I think an informed board member is a better
board member, and that would contribute to that process. Thank
you.

CHAIRMAN SELLERS: Okay. Thank you.

MR. THOMPSON: Just a heads up, what I'd like to
do is also going through the process again --

MS. PRIANO: Could you talk into the microphone,
please?

MR. THOMPSON: Thank you.

What I'd like to do is also going through the
process for ADOT on various projects in the rural area
(inaudible) I'd like to have represented from the ADOT, NDOT, I
mean, Navajo County, and maybe the leadership (inaudible) the
legislative branch, but that will be determined. I talked to
Greg already about it. So I just wanted to let the Board know
that.

MR. ROEHRICH: So Mr. Chair, Mr. Thompson, when
you say you want to make this a Board topic of discussion, or
you just want to have a separate offline discussion with
MR. THOMPSON: (Inaudible.)

MR. ROEHRICH: Okay. That's fine. I just wanted to know if (inaudible) about it. I'm not doing anything about it, so I don't care now. Doesn't affect the Board (inaudible). You talk to whoever the hell you want. You guys take care of. So I just wanted to clarify that.

CHAIRMAN SELLERS: Do I have a motion to adjourn?

MR. STRATTON: So moved.

MR. HAMMOND: Second.

CHAIRMAN SELLERS: All in favor.

BOARD MEMBERS: Aye.

MR. ROEHRICH: Mr. Chair, I heard a motion, and then who seconded?

CHAIRMAN SELLERS: Mike Hammond.

MR. ROEHRICH: Hammond. Thank you.

CHAIRMAN SELLERS: The meeting is adjourned.

(Board meeting adjourned at 12:13 p.m.)
Adjournment

A motion to adjourn the June 21, 2019 State Transportation Board meeting was made by Board Member Hammond and seconded by Board Member Thompson. In a voice vote, the motion carried.

Meeting adjourned at 12:30 p.m. MST.

Jack Sellers, Chairman
State Transportation Board

John S. Halikowski, ADOT Director
Arizona Department of Transportation
