MULTIMODAL PLANNING DIVISION REPORT

November 20, 2020

Multimodal Planning Division Director:

Greg Byres, P.E.

Current Planning Activities

- Design Concept Report for I-10, L-202 to SR 387
- Progress with P2P for 2022-2026 Program

Design Concept Report for I-10, L-202 to SR 387

- Through coordination with ADOT, MAG and the Gila River Indian Community (GRIC), an alternatives plan has been created.
- A virtual public meeting was held last night where the alternatives were present and the public was requested to provide comment.

P2P Progress for 2022-2026 Program

- District workshops were completed and the prioritization process has also been completed.
- The top scoring projects will now go through the planning level scoping process, where a project scope will be finalized and a unit cost estimate will be determined for each project. The number of projects that make it into the program will be based on funding availability with prioritization being the basis for project selection.
